

Lenovo ThinkSystem SR655 Server

Product Guide (withdrawn product)

The Lenovo ThinkSystem SR655 is a 1-socket 2U server that features the AMD EPYC 7002 "Rome" and AMD EPYC 7003 "Milan" families of processors. With up to 64 cores per processor and support for the PCIe 4.0 standard for I/O, the SR655 offers the ultimate in single-socket server performance. With up to 128 PCIe lanes, the server is ideal for workloads that can take advantage of GPU processing and high-performance NVMe drives.

Suggested uses: AI Inference, VDI, OLTP, Analytics, software-defined storage, rack-based workstations

Figure 1. Lenovo ThinkSystem SR655

Did you know?

By using a high-performance server with only one processor installed, you can take advantage of lower software costs when the software licensing is using a per-socket model.

The SR655 has been designed to take advantage of the features of the EPYC 7002 and 7003 processors, such as the full performance of 280W 64-core processors, support for 3200 MHz memory and PCIe Gen 4.0 support. Competitive servers that are based on the older EPYC 7001 "Naples" designs may not be able to offer these performance features.

Key features

Combining performance and flexibility, the SR655 server is a great choice for enterprises of all sizes. The server offers a broad selection of drive and slot configurations and offers high performance features that industries such as finance, healthcare and telco need. Outstanding reliability, availability, and serviceability (RAS) and high-efficiency design can improve your business environment and can help save operational costs.

Scalability and performance

The SR655 offers numerous features to boost performance, improve scalability and reduce costs:

- Supports the AMD EPYC 7002 and EPYC 7003 families family of processors
- Supports processors with up to 64 cores and 128 threads, core speeds of up to 4.1 GHz, and TDP ratings of up to 280W.
- Support for up to 16 TruDDR4 memory DIMMs, with 8 memory channels and 2 DIMMs per channel. With 1 DIMM installed per channel (8 DIMMs total), memory operates at up to 3200 MHz. With 2 DIMMs per channel (16 DIMMs total), memory operating at up to 2933 MHz.
- Using 128GB 3DS DIMMs, the server supports up to 2TB of system memory.
- Supports 2 double-width GPUs up to 300W each, or 6 single-width GPUs up to 75W each. A 6:1 ratio of GPUs to CPUs means substantial processing power is available with just one CPU.
- Supports up to 32x 2.5-inch hot-swap drive bays, by using combinations of front-accessible (up to 24 bays), mid-accessible (up to 8), and rear-accessible (up to 4) drive bays.
- Supports 3.5-inch drive bays for lower-cost high-capacity storage. 2.5-inch and 3.5-inch drive bays can be mixed in several combinations.
- Supports 16x SATA drives using the onboard SATA controller (no additional adapter needed), enabling lower cost, high capacity storage solution for cold storage workloads.
- Supports up to 28x NVMe drives without oversubscription of PCIe lanes (1:1 connectivity), or up to 32x NVMe drives with a 2:1 oversubscription. The use of NVMe drives maximizes drive I/O performance, in terms of throughput, bandwidth, and latency.
- Supports high-speed RAID controllers from Broadcom providing 12 Gb SAS connectivity to the drive backplanes. A variety of RAID adapters are available, with cache and support for up to 24 drives on a single controller.
- Supports M.2 drives for convenient operating system boot functions. Available M.2 adapters support either one M.2 drive or two M.2 drives in a RAID 1 configuration for performance and reliability.
- The server has a dedicated industry-standard OCP 3.0 small form factor (SFF) slot, with a PCIe 4.0 x16 interface, supporting a variety of Ethernet network adapters. Simple-swap mechanism with thumbscrews and pull-tab enables tool-less installation and removal of the adapter. Supports shared BMC network sideband connectivity to enable out-of-band systems management.
- The server offers PCI Express 4.0 I/O expansion capabilities that doubles the theoretical maximum bandwidth of PCIe 3.0 (16GT/s in each direction for PCIe 4.0, compared to 8 GT/s with PCIe 3.0). A PCIe 4.0 x16 slot provides 64 GB/s bandwidth, enough to support a 400GbE network connection.
- A total of up to 9 PCIe 4.0 slots (8 with rear access, 1 internal for a RAID adapter) plus a slot dedicated to the OCP adapter.

Availability and serviceability

The SR655 provides many features to simplify serviceability and increase system uptime:

- The server uses ECC memory and supports memory RAS features including Single Device Data Correction (SDDC, also known as Chipkill), Patrol/Demand Scrubbing, DRAM Address Command Parity with Replay, and DRAM Uncorrected ECC Error Retry.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- The M.2 SATA RAID Boot Adapter supports RAID-1 which enables two installed M.2 drives to be configured as a redundant pair.
- The server has up to two hot-swap redundant power supplies and six hot-swap redundant fans to provide availability for business-critical applications.
- The power-source-independent light path diagnostics uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Solid-state drives (SSDs) offer more reliability than traditional mechanical HDDs for greater uptime.
- The built-in ASPEED AST2500 baseboard management controller (BMC) continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Proactive Platform Alerts: Voltage regulators, memory, fans, power supplies, server ambient and subcomponent temperatures. Alerts can be surfaced through the BMC to managers such as Lenovo XClarity Administrator. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.
- Web-based ThinkSystem System Manager (TSM) provides remote access to the BMC for remote management.
- Lenovo XClarity Provisioning Manager Lite (LXPM Lite) tool can be used to install an operating system on the server and perform system diagnostics.
- Three-year or one-year customer-replaceable unit and onsite limited warranty, 9 x 5 next business day. Optional service upgrades are available.

Manageability and security

Systems management features simplify local and remote management of the SR655:

- Supports Lenovo XClarity Provisioning Manager Lite (LXPM Lite) for system setup and firmware upgrades.
- An integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Support for industry standard management protocols, IPMI 2.0, SNMP 3.0, Redfish REST API, serial console via IPMI
- An integrated hardware Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Administrator and power-on passwords help protect from unauthorized access to the server.
- Support for Lenovo XClarity Energy Manager, which captures real-time power and temperature data from the server and integrates with Redfish-based applications to provide automated controls to lower energy costs.
- Supports AMD Secure Root-of-Trust, Secure Run and Secure Move features to minimize potential attacks and protect data as the OS is booted, as applications are run and as applications are migrated from server to server.
- Supports Secure Boot to ensure only a digitally signed operating system can be used.

- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.

Energy efficiency

The SR655 offers the following energy-efficiency features to save energy, reduce operational costs, and increase energy availability:

- Energy-efficient planar components help lower operational costs.
- High-efficiency power supplies with 80 PLUS Platinum and Titanium certifications
- Low-voltage 1.2 V DDR4 memory offers energy savings compared to 1.35 V and 1.5 V DDR3 DIMMs.
- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.
- Optional Lenovo XClarity Energy Manager provides power and thermal monitoring to help achieve lower heat output and reduced cooling needs.

Components and connectors

The following figure shows the front of the server.

Figure 2. Front view of the Lenovo ThinkSystem SR655

The following figure shows the components visible from the rear of the server. As shown, there are three different configurations available

Figure 3. Rear view of the Lenovo ThinkSystem SR655

The following figure shows the locations of key components inside the server.

Figure 4. Internal view of the Lenovo ThinkSystem SR655

System architecture

The following figure shows the architectural block diagram of the SR655, showing the major components and their connections.

Figure 5. SR655 system architectural block diagram

* Riser 1 has a x16 system board connection. For 32 lanes, the riser receives 16 lanes from two x8 onboard slimline connectors via cables

** Riser 3 and Internal slot are connected to onboard connectors; no system board slots

Standard specifications

The following table lists the standard specifications.

Table 1. Standard specifications

Components	Specification
Machine types	7Y00 - 1 year warranty 7Z01 - 3 year warranty
Form factor	2U rack.
Processor	One AMD EPYC 7002 Series processor (formerly codenamed "Rome") or AMD EPYC 7003 Series processors (formerly codenamed "Milan"). Supports processors up to 64 cores, core speeds of up to 4.1 GHz, and TDP ratings of up to 280W.
Memory	16 DIMM slots. The processor has 8 memory channels, with 2 DIMMs per channel. Lenovo TruDDR4 RDIMMs are supported. DIMMs are available in two speeds: 3200 MHz and 2933 MHz. With 3200 MHz memory, the server supports a 3200 MHz memory bus speed at 1 DIMM per channel (DPC) and 2933 MHz at 2 DPC. With 2933 MHz memory, the server supports a 2933 MHz memory bus speed at both 1 and 2 DPC.
Memory maximum	Up to 2TB with 16x 128GB 3DS RDIMMs
Persistent memory	Not supported.
Memory protection	ECC, SDDC, Patrol/Demand Scrubbing, DRAM Address Command Parity with Replay, DRAM Uncorrected ECC Error Retry, Post Package Repair
Disk drive bays	Up to 20x 3.5-inch or 32x 2.5-inch hot-swap drive bays*: • Front: up to 12x 3.5-inch or 24x 2.5-inch, hot-swap bays • Mid (internal): up to 4x 3.5-inch or 8x 2.5-inch, hot-swap bays • Rear: up to 4x 3.5-inch or 4x 2.5-inch hot-swap bays With 2.5-inch drive bays, mid (internal) bays and rear drives are mutually exclusive. See Supported drive bay combinations for details. Mid bays are hot-swap drive bays and are accessible by removing the top cover of the server. 4x 3.5-inch front drive bays can be configured as AnyBay supporting SAS, SATA or NVMe. 2.5-inch drive bays can be configured as NVMe, supporting 28x NVMe drives with direct connections (no oversubscription), or 32x NVMe drives with 2:1 oversubscription. * Note: The server supports at most 32 drives, even though there are 36 physical 2.5-inch drive bays.
Maximum internal storage	• 2.5-inch drives: ◦ 983.04TB using 32x 30.72TB 2.5-inch SAS/SATA SSDs ◦ 737.28TB using 24x 30.72TB 2.5-inch NVMe SSDs ◦ 76.8TB using 32x 2.4TB 2.5-inch HDDs • 3.5-inch drives: ◦ 440TB using 20x 22TB 3.5-inch HDDs ◦ 307.2TB using 20x 15.36TB 3.5-inch SAS/SATA SSDs ◦ 51.2TB using 4x 12.8TB 3.5-inch NVMe SSDs

Components	Specification
Storage controller	- Onboard SATA supporting up to 16 SATA drives (no RAID) 12 Gb SAS/SATA RAID adapters: - RAID 530i (cacheless) supports RAID 0, 1, 10, 5, 50 - RAID 730-8i with 1GB cache supports RAID 0, 1, 10, 5, 50 - RAID 730-8i with 2GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60 - RAID 930-8i with 2GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60 - RAID 930-16i and 24i with 4GB or 8GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60 12 Gb SAS/SATA non-RAID: 430-8i and 430-16i HBAs
Optical drive bays	No internal optical drive.
Tape drive bays	No internal backup drive.
Network interfaces	Dedicated OCP 3.0 SFF slot with PCIe 4.0 x16 host interface. Supports a variety of 2-port and 4-port adapters with 1GbE, 10GbE and 25GbE network connectivity. One port can optionally be shared with the ASPEED management processor for Wake-on-LAN and NC-SI support.
PCI Expansion slots	A total of up to 9 PCIe 4.0 slots (8 with rear access, 1 internal for a RAID adapter) plus a slot dedicated to the OCP adapter. Slot availability is based on riser selection. Slot length is dependent on the use of a mid-chassis drive cage: If the mid drive cage is present then slots are half-length; if the mid drive cage is not present, then slots are full-length. - Riser 1: Slots 1, 2 and 3 - all FHHL or FHFL (16 or 32 lanes) - Option 1*: 1=x16, 2=x8, 3=x8 - Option 2*: 1=x16, 2=x16 (no slot 3) - Option 3: 3=x16 (no slot 1 or slot 2) - Option 4: 1=x16 (no slot 2 or slot 3) - Riser 2: Slots 4, 5, and 6 - slot size varies (32 lanes) - Option 1: 4=x16, 5=x8, 6=x8 - Option 2: 4=x16, 5=x16 (no slot 6) - Option 3: 6=x16 (no slot 4 or slot 5) - Riser 3: Slots 7 and 8 - both FHHL or FHFL (16 or 32 lanes) - Option 1*: 7=x8, 8=x8 - Option 2*: 7=x16, 8=x16 - Slot 9: Internal PCIe 4.0 x8 low-profile slot for internal drive controller * The use of 32 lanes with Riser 1 or the use of Riser 3 imposes restrictions on the use of the onboard SATA controller or the use of the M.2 Module or both. See the I/O expansion section for details.
Ports	Front: Two USB 3.1 G1 (5 Gb/s) ports, optional VGA port. Rear: USB 3.1 G1 (5 Gb/s) ports, one VGA video port, one DB-9 serial port, and one RJ-45 1GbE systems management port. Internal: Optional M.2 module supporting up to two M.2 drives (for OS boot and drive storage support; not available in all configurations).
Cooling	Five or six N+1 redundant single-rotor hot swap 60 mm fans, configuration dependent. One fan integrated in each power supply.
Power supply	Up to two hot-swap redundant AC power supplies (all 80 PLUS Platinum certification): 550 W, 750 W, 1100 W and 1600 W AC options, supporting 220 V AC. 550 W, 750 W and 1100 W options also support 110V input supply. In China only, all power supply options support 240 V DC. Also available is a 1100W power supply with a -48V DC input.
Video	Onboard graphics with 512 MB memory with 2D hardware accelerator, integrated into the ASPEED AST2500 BMC management processor. Maximum resolution is 1920x1200 at 60Hz, 32bpp

Components	Specification
Hot-swap parts	Drives, power supplies, and fans.
Systems management	ASPEED AST2500 embedded management processor, XClarity Provisioning Manager Lite (LXPM Lite) for system setup and firmware upgrades. XClarity Administrator centralized infrastructure management, and XClarity Energy Manager centralized server power management. Light path diagnostics for local failure detection and reporting.
Security features	Power-on password, administrator's password, Trusted Platform Module (TPM), supporting TPM 2.0. In China only, optional Nationz TPM 2.0. Optional lockable front security bezel. Optional chassis intrusion switch.
Operating systems supported	Microsoft Windows Server, Microsoft Windows 10 & 11, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi. See the Operating system support section for specifics.
Limited warranty	Three-year or one-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.
Dimensions	Width: 445 mm (17.5 in.), height: 87 mm (3.4 in.), depth: 764 mm (30.1 in.). See Physical and electrical specifications for details.
Weight	Maximum: 35.4 kg (78.0 lb)

Models

ThinkSystem SR655 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. For CTO models, two types of base CTO models are available for the SR655 as listed in the columns in the following table:

- General purpose base CTO models are for general business (non-HPC) and is selectable by choosing **General Purpose** mode in DCSC.
- AI and HPC base models are intended for Artificial Intelligence (AI) and High Performance Computing (HPC) configurations and solutions are enabled using the **AI & HPC Hardware - ThinkSystem Hardware** mode in DCSC. These configurations, along with Lenovo EveryScale Solutions, can also be built using [System x and Cluster Solutions Configurator \(x-config\)](#). **Tip:** Some HPC and AI models are not listed in DCSC and can only be configured in x-config.

"For AI" models: The base CTO models listed in the table with "for AI" in the names are the only base models that support high-performance GPUs and accelerators (Controlled GPUs). These models are classified under US Government ECCN regulations and have limited market and customer availability. All other base models do not support high-performance GPUs.

Preconfigured server models may also be available for the SR655, however these are region-specific; that is, each region may define their own server models, and not all server models are available in every region.

The following table lists the base CTO models of the ThinkSystem SR655 server.

Table 2. Base CTO models

Machine Type/Model General purpose	Machine Type/Model for AI and HPC	Description
7Z01CTO1WW	7Z01CTOLWW	ThinkSystem SR655 - 3yr Warranty
7Z01CTOAWW	7Z01CTOHHW	ThinkSystem SR655 - 3yr Warranty for AI
7Y00CTO1WW	7Y00CTOLWW	ThinkSystem SR655 - 1yr Warranty

The SR655 can now run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, the following Base CTO models have been announced to assist building a configuration that can be used with the client operating systems. For more information, see the [Windows 10 and Windows 11](#) section.

Table 3. Base CTO models for SR655 with Windows 10 and Windows 11

Machine Type/Model General purpose	Description
7Z01CTO2WW	ThinkSystem SR655 Workstation - 3 year Warranty
7Y00CTO2WW	ThinkSystem SR655 Workstation - 1 year Warranty

Models of the SR655 are defined based on whether the server has 2.5-inch drive bays at the front (called the 24x 2.5" chassis) or whether it has 3.5-inch drive bays at the front (called the 12x 3.5" chassis). For models, the feature codes for these chassis bases are as listed in the following table.

Table 4. Chassis base feature codes

Feature code	Description
B5VK	ThinkSystem SR655 12x3.5" Chassis
B5VJ	ThinkSystem SR655 24x2.5" Chassis

The following tables list the available models, grouped by region.

- [Models for Australia and New Zealand](#)
- [Models for South East Asian countries \(ASEAN\)](#)
- [Models for Brazil](#)
- [Models for EMEA countries](#)
- [Models for Hong Kong, Taiwan, Korea \(HTK\)](#)
- [Models for India](#)
- [Models for Japan](#)
- [Models for Latin American countries \(except Brazil\)](#)
- [Models for USA and Canada](#)

Refer to the Specifications section for information about standard features of the server.

Processors

The SR655 supports processors in the AMD EPYC family of processors. The server supports one processor.

- [Processor options](#)
- [Processor features](#)
- [UEFI operating modes](#)

Processor options

The table below lists the supported AMD processors.

All supported processors have the following characteristics:

- Third and second-generation AMD EPYC processors (formerly codenamed "Milan" and "Rome" respectively)
- 7 nm process technology
- Eight DDR4 memory channels
- 128 PCIe 4.0 I/O lanes

Part numbers: Processors do not include an option part number because there are no field upgrades supported.

Table 14. Processor options for the SR655

Processor features

The following table lists the features of the supported processors.

P suffix: Processor models with a P suffix are designated as single-socket processors. They have identical features to the non-P equivalent processors.

The following table lists the features of the supported processors.

Table 15. Processor specifications

EPYC model**	Cores / Threads	Base Frequency	Max Boost Frequency†	L3 Cache	Memory channels	Memory bus	TDP
Third-generation AMD EPYC processors							
7203 / 7203P	8 / 16	2.8GHz	3.4 GHz	64 MB	8	3200 MHz	120W
72F3	8 / 16	3.7 GHz	4.1 GHz	256 MB	8	3200 MHz	180 W
7303 / 7303P	16 / 32	2.4GHz	3.4 GHz	64 MB	8	3200 MHz	130W

EPYC model**	Cores / Threads	Base Frequency	Max Boost Frequency†	L3 Cache	Memory channels	Memory bus	TDP

7F72	24 / 48	3.2 GHz	3.7 GHz	192 MB	8	3200 MHz	240W
7452	32 / 64	2.35 GHz	3.35 GHz	128 MB	8	3200 MHz	155 W
7502 / 7502P	32 / 64	2.5 GHz	3.35 GHz	128 MB	8	3200 MHz	180 W
7532	32 / 64	2.4 GHz	3.3 GHz	256 MB	8	3200 MHz	200W
7542	32 / 64	2.9 GHz	3.4 GHz	128 MB	8	3200 MHz	225 W
7552	48 / 96	2.2 GHz	3.3 GHz	192 MB	8	3200 MHz	200 W
7642	48 / 96	2.3 GHz	3.3 GHz	256 MB	8	3200 MHz	225 W
7662	64 / 128	2.0 GHz	3.3 GHz	256 MB	8	3200 MHz	225W
7702 / 7702P	64 / 128	2.0 GHz	3.35 GHz	256 MB	8	3200 MHz	200 W
7742	64 / 128	2.25 GHz	3.4 GHz	256 MB	8	3200 MHz	225 W
7H12	64 / 128	2.6 GHz	3.3 GHz	256 MB	8	3200 MHz	280W

† The maximum single-core frequency at which the processor is capable of operating

* This processor supports 8 memory channels at 3200 MHz, however performance is optimized for 4 channels at 2666 MHz

** Processors with a P suffix are single-socket capable processors

UEFI operating modes

The SR655 offers preset operating modes that affect energy consumption and performance. These modes are a collection of predefined low-level UEFI settings that simplify the task of tuning the server to suit your business and workload requirements.

The following table lists the feature codes that allow you to specify the mode you wish to preset in the factory for CTO orders.

UK and EU customers: For compliance with the ERP Lot9 regulation, you should select feature BFYA. For some systems, you may not be able to make a selection, in which case, it will be automatically derived by the configurator.

Table 16. UEFI operating mode presets in DCSC

Feature code	Description
BFYA	Operating mode selection for: "Maximum Efficiency Mode"
BFYB	Operating mode selection for: "Maximum Performance Mode"

The preset modes for the SR655 are as follows:

- **Maximum Efficiency Mode** (feature BFYA): Maximizes performance/watt efficiency while maintaining reasonable performance
- **Maximum Performance Mode** (feature BFYB): Achieves maximum performance but with higher power consumption and lower energy efficiency.

For details about these preset modes, and all other performance and power efficiency UEFI settings offered in the SR655, see the paper "Tuning UEFI Settings for Performance and Energy Efficiency on AMD Processor-Based ThinkSystem Servers", available from <https://lenovopress.lenovo.com/lp1267>.

Memory options

The SR655 uses Lenovo TruDDR4 memory operating at up to 3200 MHz. The processors have 8 memory channels and support 2 DIMMs per channel, for a total of 16 DIMMs. The server supports up to 2TB of memory using 16x 128 GB 3DS RDIMMs.

The server supports these memory DIMMs:

- 2933 MHz DIMMs, that operate at 2933 MHz both at 1 DIMM per channel and 2 DIMMs per channel
- 3200 MHz DIMMs, that operate at 3200 MHz at 1 DIMM per channel, and at 2933 MHz at 2 DIMMs per channel

Note that if the processor selected has a memory bus speed of 2666 MHz, then all DIMMs will operate at 2666 MHz, even if the DIMMs are rated for a higher speed MHz.

The following table lists the memory options that are available for the server.

Lenovo TruDDR4 memory uses the highest quality components that are sourced from Tier 1 DRAM suppliers and only memory that meets the strict requirements of Lenovo is selected. It is compatibility tested and tuned to maximize performance and reliability. From a service and support standpoint, Lenovo TruDDR4 memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

Table 17. Supported memory options

Part number	Feature code	Description	Maximum supported
2933 MHz memory			
4ZC7A08739	B7MS	ThinkSystem 8GB TruDDR4 2933MHz (1Rx8 1.2V) RDIMM-A	16
4ZC7A08740	B7MT	ThinkSystem 16GB TruDDR4 2933MHz (1Rx4 1.2V) RDIMM-A	16
4ZC7A08741	B7MU	ThinkSystem 16GB TruDDR4 2933MHz (2Rx8 1.2V) RDIMM-A	16
4ZC7A08742	B7MV	ThinkSystem 32GB TruDDR4 2933MHz (2Rx4 1.2V) RDIMM-A	16
4ZC7A08744	B7MW	ThinkSystem 64GB TruDDR4 2933MHz (2Rx4 1.2V) RDIMM-A	16
4ZC7A15113	B587	ThinkSystem 128GB TruDDR4 2933MHz (4Rx4 1.2V) 3DS RDIMM	16*
3200 MHz memory			
4ZC7A15121	B5XD	ThinkSystem 16GB TruDDR4 3200MHz (2Rx8 1.2V) RDIMM-A	16
4ZC7A15122	B5XE	ThinkSystem 32GB TruDDR4 3200MHz (2Rx4 1.2V) RDIMM-A	16
4ZC7A15123	B8NU	ThinkSystem 32GB TruDDR4 3200 MHz (2Rx8 1.2V) RDIMM-A	16
4ZC7A15124	B5XC	ThinkSystem 64GB TruDDR4 3200MHz (2Rx4 1.2V) RDIMM-A	16
4ZC7A15125	B8NT	ThinkSystem 128GB TruDDR4 3200MHz (4Rx4, 1.2V) 3DS RDIMM-A	16

* Supported in the SR655 only with an EPYC 7002 processor. Not supported with an EPYC 7003 processor.

The following rules apply when selecting the memory configuration:

- The 128GB 2933 MHz 3DS RDIMM, 4ZC7A15113, is only supported in the SR655 with an EPYC 7002 processor.
- The server supports RDIMMs and 3DS RDIMMs
- Mixing of RDIMMs and 3DS RDIMMs is not supported
- Mixing x4 and x8 DIMMs is supported, but not in the same channel
- Mixing of DIMM rank counts is supported. Follow the required installation order installing the DIMMs with the higher rank counts first.
- Mixing of DIMM capacities is supported, however only two different capacities are supported all channels of the processor (eg 32GB and 64GB). Follow the required installation order installing the

larger DIMMs first.

- Mixing of 3200 MHz and 2933 MHz DIMMs is supported. Installed memory will operate at the lower speed.
- Memory mirroring and memory rank sparing are not supported.
- When a GPU is added as a field upgrade, all empty DIMM slots must have a dummy DIMM blank installed in each DIMM slot, to ensure the optimal air flow. Ordering information is in the following table. For CTO orders, the dummy DIMMs are derived by the configurator.

Table 18. ThinkSystem Dummy DIMM Kit

Part number	Description	Quantity required
4M27A11810	ThinkSystem Dummy DIMM Package Kit (contains 24 dummy memory DIMMs)	1

For best performance, consider the following:

- Ensure the memory installed is at least the same speed as the memory bus of the selected processor.
- Populate memory DIMMs in quantities of 8 or 16, so that all memory channels are used.
- Populate memory channels so they all have the same total memory capacity.
- For more details on how to best configure the memory subsystem for performance, refer to the Lenovo Press paper “Balanced Memory Configurations with 2nd Gen and 3rd Gen AMD EPYC Processors” available from <https://lenovopress.com/lp1268-balanced-memory-configurations-with-amd-epyc-processors>

The following memory protection technologies are supported:

- ECC detection/correction
- SDDC (for x4-based memory DIMMs; look for "x4" in the DIMM description)
- Patrol/Demand Scrubbing
- DRAM Address Command Parity with Replay
- DRAM Uncorrected ECC Error Retry
- Post Package Repair

Internal storage

The SR655 supports up to 20x 3.5-inch or 32x 2.5-inch drive bays, depending on the selected chassis and backplane configuration. Drives can be all SAS, all SATA, or all NVMe, or combinations of all three (not in the same RAID array, if configured). The server also supports configurations without any drive bays if desired.

All drives are hot-swap and are accessible from the front, from the rear, or from drive bays that are located in the middle of the server (accessible when you remove the top cover of the server).

The three drive zones are as follows:

- Front: up to 12x 3.5-inch or 24x 2.5-inch, hot-swap bays
- Mid (internal): up to 4x 3.5-inch or 8x 2.5-inch, hot-swap bays
- Rear: up to 4x 3.5-inch or 4x 2.5-inch hot-swap bays

The server also supports one or two M.2 drives, installed in an M.2 adapter.

In this section:

- [NVMe drive support](#)
- [Front drive bays](#)
- [Mid drive bays](#)
- [Rear drive bays](#)
- [Supported drive bay combinations](#)
- [Adapters selections](#)
- [Field upgrades](#)
- [M.2 drives](#)

NVMe drive support

PM983 hot-swap support: To support hot-swap of PM983 NVMe drives, the server needs to have UEFI v2.0 (Build ID CFE108O) or later installed.

The SR655 supports NVMe drives to maximize storage performance, as follows:

- Up to 28 NVMe drives without oversubscription (that is, each x4 drive has a full x4 (4 lanes) connection to the processor)
 - 24 NVMe drives in the front bays
 - 4 NVMe drives in the rear bays
- Up to 32 NVMe drives with a 2:1 oversubscription (that is, each x4 drive has a x2 connection (2 lanes) to the processor)
 - 24 NVMe drives in the front bays
 - 8 NVMe drives in the mid bays
- Up to 4x NVMe drives in a 3.5-inch drive configuration
 - All installed in front bays

The specifics of these configurations plus other NVMe-rich configurations are covered in the [Supported drive bay combinations](#) and [Adapters selections](#) sections.

15mm NVMe drives: 15mm NVMe SSDs are not supported in the mid or rear drive bays due to thermal requirements. Only 7mm NVMe drives are supported in those zones. See the [PCIe 4.0 NVMe SSDs table](#) and [PCIe 3.0 NVMe SSDs table](#) for specifics.

Front drive bays

The front drive bay zone supports the following configurations:

- 3.5-inch drive bays
 - No drives and no backplane (supports field upgrades)
 - 8x 3.5-inch SAS/SATA (no upgrades)
 - 12x 3.5-inch SAS/SATA (no upgrades)
 - 8x 3.5-inch SAS/SATA + 4x 3.5-inch AnyBay (AnyBay supports SAS or SATA or NVMe drives) (no upgrades)
- 2.5-inch drive bays
 - No drives and no backplane (supports field upgrades)
 - 8x 2.5-inch SAS/SATA (supports field upgrades to 16 or 24 drives)
 - 16x 2.5-inch SAS/SATA (supports field upgrades to 24 drives)
 - 24x 2.5-inch SAS/SATA (no upgrades)
 - 8x 2.5-inch NVMe (supports field upgrades to 16 or 24 drives)
 - 16x 2.5-inch NVMe (supports field upgrades to 24 drives)
 - 24x 2.5-inch NVMe (no upgrades)
 - 8x 2.5-inch NVMe + 8x 2.5-inch SAS/SATA (supports upgrade to 16x SAS/SATA)
 - 8x 2.5-inch NVMe + 16x 2.5-inch SAS/SATA (no upgrades)

These configurations are shown in the following figure.

Figure 6. SR655 front drive bay configurations

The backplanes used to provide these drive bays are listed in the following table.

Table 19. Backplanes for front drive bays

Part number	Feature code	Description	Maximum supported
Front 3.5-inch drive backplanes			
See note*	AUR6	ThinkSystem 2U 3.5" SATA/SAS 8-Bay Backplane (8-bay 3.5-inch SAS/SATA backplane)	1
See note*	AUR9	ThinkSystem 2U 3.5" SATA/SAS 12-Bay Backplane (12-bay 3.5-inch SAS/SATA backplane)	1
See note*	AUR8	ThinkSystem 2U 3.5" AnyBay 12-Bay Backplane (12-bay 3.5-inch backplane with 8x SAS/SATA bays + 4x AnyBay bays†)	1

Part number	Feature code	Description	Maximum supported
Front 2.5-inch drive backplanes			
See note*	AURA	ThinkSystem 2U/Twr 2.5" SATA/SAS 8-Bay Backplane (8-bay 2.5-inch SAS/SATA backplane)	3
See note*	B4PC	ThinkSystem 2U 2.5" NVMe 8-Bay Backplane (8-bay 2.5-inch NVMe backplane)	3

* Backplanes are available as part numbers for field upgrades using upgrade kits, as described in the [Field upgrades](#) section below.

† Does not support PCIe 4.0 NVMe drives

The use of NVMe drives may limit the use of PCIe slots or M.2 drives as described in the [I/O expansion](#) section.

280W processor support: There are some restrictions regarding the use of some drive configurations with a 280W processor installed due to thermal restrictions. See the [Operating environment](#) section for details.

Mid drive bays

The SR655 supports hot-swap drives installed in the middle of the server chassis. The drive bays are accessible by removing the top lid of the server and levering the mid drive chassis.

The following configurations are supported:

- 4x 3.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap NVMe drive bays

The drive bays in the open position are shown in the following figure.

Note: The figure shows an M.2 Module installed in the 2.5-inch drive bays, however installing the M.2 Module in this location is currently not supported

Figure 7. Mid-chassis drive bays

The backplanes used to provide these drive bays are listed in the following table.

Table 20. Backplanes for mid drive bays

Part number	Feature code	Description	Maximum supported
Mid - 3.5-inch drive backplane			
See note*	BCPB	ThinkSystem 1U 3.5" SATA/SAS 4-Bay Backplane	1
Mid - 2.5-inch drive backplanes			
See note*	B5VP	ThinkSystem SR655 2.5" SATA/SAS 4-Bay Middle Backplane	2‡
See note*	B5VN	ThinkSystem 2.5" NVMe 4-Bay Middle Backplane	2‡

* Backplanes are available as part numbers for field upgrades using upgrade kits, as described in the [Field upgrades](#) section below.

‡ 2.5-inch drive backplanes for the mid-chassis area must be installed in pairs. NVMe and SAS/SATA cannot be mixed.

The use of drive bays in the mid-chassis area has the following configuration rules:

- Processors with TDP higher than 155W are not supported
- Full-length adapter cards are not supported
- GPUs (including low profile GPUs such as the T4) are not supported
- If 2.5-inch mid-chassis drive bays are configured then rear drive bays are not supported. See the [Supported drive bay combinations](#) section for more information.
- The use of NVMe drives in the mid bays requires to use of a PCIe switch

Rear drive bays

The SR655 supports hot-swap drives installed at the rear of the server chassis. Supported configurations are as follows:

- 4x 3.5-inch hot-swap SAS/SATA drive bays
- 4x 2.5-inch hot-swap SAS/SATA drive bays
- 4x 2.5-inch hot-swap NVMe drive bays

The configurations are shown in the following figure.

Figure 8. Rear drive bay configurations

The backplanes used to provide these drive bays are listed in the following table.

Table 21. Backplanes for rear drive bays

Part number	Feature code	Description	Maximum supported
Rear - 3.5-inch drive backplane			
See note*	AUW8	ThinkSystem 3.5" SATA/SAS 4-Bay Backplane	1
Rear - 2.5-inch drive backplanes			
See note*	BCPD	ThinkSystem SR655 2.5" SATA/SAS 4-Bay Rear Backplane	1
See note*	BCPC	ThinkSystem SR655 2.5" NVMe 4-Bay Rear Backplane	1

* Backplanes are available as part numbers for field upgrades using upgrade kits, as described in the [Field upgrades](#) section below.

The use of rear drive bays has the following configuration rules:

- GPUs are not supported
- If 3.5-inch rear drive bays are configured:
 - Only slots 3 and 6 are available, as described in the [I/O expansion](#) section
 - The intrusion switch is not supported.
- If 2.5-inch rear drive bays are configured
 - Slots 7 and 8 are not available, as described in the [I/O expansion](#) section
 - The intrusion switch may be support via Special Bid.
- The use of NVMe drives in rear bays requires the use of a PCIe switch

Supported drive bay combinations

This section describes the various combinations of 3.5-inch and 2.5-inch drives that the server supports. The drive bay combinations are grouped based on the drive type at the front of the server, 3.5-inch or 2.5-inch.

3.5-inch drive bay chassis

The following table shows the supported combinations when the server is configured with a 3.5-inch chassis (where the front drive bays are 3.5-inch). In this configuration:

- When the front bays are 3.5-inch bays, the mid bays are also 3.5-inch bays, however the rear zone can be either 2.5-inch SAS/SATA or 3.5-inch SAS/SATA
- NVMe is only supported in the front bays, using the AnyBay backplane (which offers 4x NVMe-capable drive bays)

The choice of storage controller for each configuration is listed in the [Adapter selections](#) section.

Table 22. Drive bay combinations with 3.5-inch chassis (Blue cells = SAS/SATA, Purple cells = AnyBay)

Config	Total drives	Front bays (3.5")		Mid bays (3.5")	Rear bays (3.5" or 2.5")	
		SAS/SATA	AnyBay	SAS/SATA	3.5" SAS/SATA	2.5" SAS/SATA
3.5-inch chassis - SAS/SATA drives only						
A	8	8	0	0	0	0
B	12	12	0	0	0	0
C	16	12	0	0	4	0
D	16	12	0	0	0	4
E	20	12	0	4	4	0
F	20	12	0	4	0	4
3.5-inch chassis - SAS/SATA and AnyBay drives

2.5-inch drive bay chassis

The server has 36 drive bays in total, however up to 32 drives are supported in a configuration.

The following table shows the supported combinations when the server is configured with a 2.5-inch chassis (where the front drive bays are 2.5-inch). In this configuration:

- With the 2.5-inch chassis, all drive bays are 2.5-inch bays. No 3.5-inch drives are supported with the 2.5-inch chassis.
- Mid bays and Rear bays cannot be used concurrently

The choice of storage controller for each configuration is listed in the [Adapter selections](#) section.

Table 23. Drive bay combinations with 2.5-inch chassis (Blue cells = SAS/SATA, Red cells = NVMe)

Config	Total drives	Front bays (2.5")		Mid bays (2.5")		Rear bays (2.5")	
		SAS/SATA	NVMe	SAS/SATA	NVMe	SAS/SATA	NVMe
2.5-inch chassis - SAS/SATA drives only							
A	8	8	0	0	0	0	0

Config	Total drives	Front bays (2.5")		Mid bays (2.5")		Rear bays (2.5")	
		SAS/SATA	NVMe	SAS/SATA	NVMe	SAS/SATA	NVMe

Adapter selections

The following tables lists the supported drive bay combinations plus the list of supported controller combinations supported by each of those drive bay combinations. Information about the controllers can be found in the [Controllers for internal storage](#) section.

General rules for adapters:

- The RAID 730-8i 1G cannot be used for connection to the rear drive bays
- Only the RAID 530-8i or the 430-8i HBA can be selected when a separate controller is needed for the rear drive bays
- The RAID 730-8i 2G cannot be used in the same server as the RAID 730-8i-1G or RAID 930-8i
- The M.2 Adapter is not supported in configurations of 16 or more 2.5-inch NVMe drives in the front bays
- For performance reasons, select the 1610-4P NVMe switch adapter instead of the 810-4P NVMe switch adapter, when available

Table 24. Drive bay combinations with 3.5-inch chassis (S/S = SAS/SATA) (Blue cells = SAS/SATA, Purple cells = AnyBay)

Cfg	Total drives	Front bays (3.5")		Mid bays (3.5")	Rear (3.5" or 2.5")		Supported controller combinations (choose one) (OB = Onboard)

T	32	0	24	0	8	0	0	- No M.2 support 16x OB NVMe + 4x 810-4P* 16x OB NVMe + 2x 1611-8P*

* The use of the 810-4P with 4 drives or 1611-8P with 8 drives results in PCIe lane oversubscription. For better NVMe drive performance without oversubscription, use a 1610-4P instead (not supported in configuration T)

Field upgrades

This section lists the available field upgrade option part numbers for storage upgrades.

- [Backplane kits](#)
- [Cable kits for 440 HBAs and RAID 940 adapters](#)
- [Cable kit for Onboard SATA controller upgrades \(X30 adapters only\)](#)
- [Cable kit for the 1611-8P adapter](#)
- [Supercap kit](#)
- [2.5-inch drive bay fillers](#)

Backplane kits

The following table lists the option part numbers for the backplane kits that allow you to add additional drive bays as field upgrades. The table also lists what major components are included in each kit.

When adding drive bays, you will also need to add the appropriate storage controller(s). Consult the tables in the [Adapter selections](#) section to determine what controller sections are supported and what additional controllers you will need. Controllers are described in the [Controllers for internal storage](#) section.

Use with X40 adapters: These backplane kits in the table below include SAS/SATA cables for use with the onboard SATA controller or with RAID 930, 730, 530 adapters and 430 HBAs (collectively called X30 adapters). If you are adding or upgrading to RAID 940 adapters or 440 HBAs (collectively called X40 adapters), you will need to *also* order an X40 cable kit. See the [Cable kits for 440 HBAs and RAID 940 adapters](#) section for details.

Table 26. Drive bay field upgrades

Part number	Description and contents of the upgrade kits	Maximum supported
Front - 3.5-inch drive backplanes (see Front drive bays)		
4XH7A09829	ThinkSystem SR655 3.5" SATA/SAS 8-Bay Backplane Kit • 1x 8-bay SAS/SATA backplane • SATA Cable Kit (power and SATA cables) • SAS/SATA Cable Kit (power cable, miniSAS-HD cable)	1
4XH7A09830	ThinkSystem SR655 3.5" SATA/SAS 12-Bay Backplane Kit • 1x 12-bay SAS/SATA backplane • SATA Cable Kit (power and SATA cables) • SAS/SATA Cable Kit (power cable, miniSAS-HD cable)	1
4XH7A09831	ThinkSystem SR655 3.5" 4 Gen3 AnyBay 12-Bay BP Kit (12-bay 3.5-inch backplane with 8x SAS/SATA bays + 4x AnyBay bays†) • 1x 12-bay AnyBay backplane • SATA Cable Kit (power and SATA cables) • SAS/SATA Cable Kit (power cable, miniSAS-HD cable) • NVMe cable (x8-to-two-x4-slimline cable)	1
Front - 2.5-inch drive backplanes (see Front drive bays)		
4XH7A09832	ThinkSystem SR655 2.5" SATA/SAS 8-Bay Backplane Kit • 1x 8-bay SAS/SATA backplane • SATA Cable Kits (power and SATA cables) • SAS/SATA Cable Kits (power cables, miniSAS-HD cables)	3

Part number	Description and contents of the upgrade kits	Maximum supported
4XH7A09833	ThinkSystem SR655 2.5" NVMe Gen4 8-Bay Backplane Kit • 1x 8-bay NVMe backplane • NVMe Cable Kits (power and x8 slimline cables)	3
Mid - 3.5-inch drive backplane (see Mid drive bays)		
4XH7A09850	ThinkSystem SR655 3.5" SATA/SAS 4-Bay Middle Drive Kit • Mid-chassis 3.5-inch drive cage • 4-bay 3.5-inch SAS/SATA backplane • 1U Performance Heatsink (replaces existing heatsink) • 6x Performance fans (replaces existing fans) • Air baffle (replace existing baffle) • SAS/SATA Cable Kit (power cable, miniSAS-HD cable)	1
Mid - 2.5-inch drive backplanes (see Mid drive bays)		
4XH7A09854	ThinkSystem SR655 2.5" SATA/SAS 8-Bay Middle Drive Kit • Mid-chassis 2.5-inch drive cage • 2x 4-bay 2.5-inch SAS/SATA backplane • 1U Performance Heatsink (replaces existing heatsink) • 6x Performance fans (replaces existing fans) • Air baffle (replace existing baffle) • 2x SAS/SATA Cable Kits (power cable, miniSAS-HD cable)	1
4XH7A09857	ThinkSystem SR655 2.5" NVMe Gen4 8-Bay Middle Drive Kit • Mid-chassis 2.5-inch drive cage • 2x 4-bay 2.5-inch NVMe backplane • 1U Performance Heatsink (replaces existing heatsink) • 6x Performance fans (replaces existing fans) • Air baffle (replace existing baffle) • 2x NVMe Cable Kits (power cable, signal cable)	1
Rear - 3.5-inch drive backplane (see Rear drive bays)		
4XH7A09851	ThinkSystem SR655 3.5" SATA/SAS 4-Bay Rear Drive Kit • Rear 3.5-inch drive cage • 4-bay 3.5-inch SAS/SATA rear backplane • PCIe Riser 1 riser (provides x16 slot 3 only) • PCIe Riser 2 riser (provides x16 slot 6 only) • 6x Performance fans (replaces existing fans) • SATA Cable Kit (power cable, SATA cable) • SAS/SATA Cable Kit (power cable, miniSAS-HD cable)	1
Rear - 2.5-inch drive backplanes (see Rear drive bays)		
4XH7A09855	ThinkSystem SR655 2.5" SATA/SAS 4-Bay Rear Drive Kit • Rear 2.5-inch drive cage • 4-bay 2.5-inch SAS/SATA rear backplane • PCIe Riser 2 riser bracket (converts existing 3-slot riser to low profile slots) • 6x Performance fans (replaces existing fans) • SATA Cable Kit (power cable, SATA cable) • SAS/SATA Cable Kit (power cable, miniSAS-HD cable)	1

Part number	Description and contents of the upgrade kits	Maximum supported
4XH7A09858	ThinkSystem SR655 2.5" NVMe Gen4 4-Bay Rear Drive Kit • Rear 2.5-inch drive cage • 4-bay 2.5-inch NVMe rear backplane • PCIe Riser 2 riser bracket (converts existing 3-slot riser to low profile slots) • 6x Performance fans (replaces existing fans) • NVM Cable Kit (power cable, signal cables)	1

† AnyBay bays support SAS or SATA or NVMe drives

Cable kits for 440 HBAs and RAID 940 adapters

The backplane kits listed in the preceding table include cables for use with the onboard SATA controller or with RAID 930, 730, 530 adapters and 430 HBAs (collectively called X30 adapters). If you wish to use the backplane kits with RAID 940 adapters or 440 HBAs (collectively called X40 adapters), then you will also need to order an additional X40 cable kit to use instead of the cables in the backplane kit.

Tip: When adding an X40 adapter, you will order both the backplane kit and the relevant X40 cable kit, however the SAS/SATA data cable(s) in the backplane kit will not be used.

Upgrades from onboard SATA: If you are upgrading a system that currently uses the onboard SATA controller and has all necessary backplanes, simply order the relevant X40 cable kit as listed in the table.

Cable kit for Onboard SATA controller upgrades (X30 adapters only)

If your existing server is configured with drive backplanes that are connected to onboard SATA ports and you wish to upgrade to an X30 RAID adapter or SAS HBA (RAID 930, 730, 530 adapters and 430 HBAs), you will need to order the cable kit listed in the following table along with the adapter(s). The cable kit includes the additional cables you will need to connect the existing backplane to the new X30 adapter. Note that the kit includes the cables needed for all supported combinations of backplanes; this means that some of the cables in the kit will not be used.

For X40 RAID adapters and HBAs, instead order one of the X40 cable kits listed in the [Cable kits for 440 HBAs and RAID 940 adapters](#) section.

Table 28. RAID adapter cable kit for servers with backplanes (X30 adapters only)

Part number	Feature code	Description
4X97A59750	BCCD	ThinkSystem SR655 SAS Cable Kit, contains four cables: • Front BP SAS/SATA Combo Cable A, SC17A59349 • 800mm MiniSAS-HD to MiniSAS-HD Cable C, SC17A50746 • 600mm Slimline 4X RA to Slimline4X, SC17A50708 • 445mm HBA HD to HD Cable A, SC17A50738

The cables in the kit are used with existing backplanes as listed in the following table.

Table 29. Use of SR655 SAS Cable Kit

Existing backplane	Needed cables
Front 3.5-inch 8x SAS/SATA Backplane	Front BP SAS/SATA Combo Cable A, SC17A59349
Front 3.5-inch 12x SAS/SATA Backplane	Front BP SAS/SATA Combo Cable A, SC17A59349 800mm MiniSAS-HD to MiniSAS-HD Cable C, SC17A50746
Front 3.5-inch 8x SAS/SATA+4xAnyBay Backplane	Front BP SAS/SATA Combo Cable A, SC17A59349 600mm Slimline 4X RA to Slimline4X, SC17A50708
Front 2.5-inch 8x SAS/SATA Backplane (order 1 cable kit per 8-drive backplane installed)	Front BP SAS/SATA Combo Cable A, SC17A59349
Rear 3.5-inch 4x SAS/SATA Backplane	445mm HBA HD to HD Cable A, SC17A50738
Rear 2.5-inch 4x SAS/SATA Backplane	445mm HBA HD to HD Cable A, SC17A50738

Cable kit for the 1611-8P adapter

The backplane kit part numbers listed in the [Drive bay field upgrades table](#) that include NVMe connections (that is, NVMe backplanes and AnyBay backplanes) only include cables for use with 1610-4P or 810-4P NVMe adapters. If you wish to use these backplane kits with the 1611-8P NVMe adapter, then you will *also* need to order an additional cable kit to use instead of the cables in the backplane kit.

Tip: When adding an 1611-8P adapter, you will order both the backplane kit and the 1611-8P cable kit, however the NVMe data cables in the backplane kit will not be used.

Table 30. Cable kit for 1611-8P adapter

Part number	Description
4X97A83644	ThinkSystem SR655 1611-8P NVMe Switch Adapter Cable Kit

Supercap kit

If you plan to add one of the RAID adapters that includes a Flash power module (supercap) as a field upgrade, then you will also need to order a Supercap installation kit for the power module. For CTO orders, the components in the installation kit are automatically derived when you select the RAID adapter. The adapters that this applies to are as follows:

- ThinkSystem RAID 730-8i 2GB Flash PCIe 12Gb Adapter
- ThinkSystem RAID 930-8i 2GB Flash PCIe 12Gb Adapter
- ThinkSystem RAID 930-16i 4GB Flash PCIe 12Gb Adapter
- ThinkSystem RAID 930-24i 4GB Flash PCIe 12Gb Adapter
- ThinkSystem RAID 940-8i 4GB Flash PCIe Gen4 12Gb Adapter
- ThinkSystem RAID 940-16i 4GB Flash PCIe Gen4 12Gb Adapter
- ThinkSystem RAID 940-32i 8GB Flash PCIe Gen4 12Gb Adapter

The power module installation kit list listed in the following table.

Table 31. RAID Flash Power Module installation kit

Part number	Feature code	Description
4XH7A09847	B72A	ThinkSystem SR635/SR655 Supercap Installation Kit • 1x Bracket to hold two supercaps in their holders • 3x Supercap holders

The following figure shows the location and use of the components of the option kit.

Figure 9. Supercap Installation Kit

2.5-inch drive bay fillers

Backplane option kits include the necessary drive bay fillers, however if needed, additional blanks can be ordered as listed in the following table.

Table 32. Drive bay fillers for 2.5-inch bays

Part number	Description
4XH7A99569	ThinkSystem 2.5" 1x1 HDD Filler by 8 units (contains 8x single drive-bay fillers)

M.2 drives

The server supports one or two M.2 form-factor SATA drives for use as an operating system boot solution or as additional storage. The M.2 drives install into an M.2 module which is mounted horizontally in the server adjacent to the internal storage controller slot as shown in the [Components and connectors](#) section.

Configuration rules:

- When the onboard SATA controller is used in conjunction with M.2 then at most 12 SATA drives can be configured
- M.2 is not supported in configurations of 16 or more 2.5-inch NVMe drives in the front bays.
- Performance fans are required for enhanced cooling. See the [Cooling](#) section for ordering information. In CTO orders, the performance fans will be automatically derived in the order.

There are two M.2 modules supported, as listed in the following table. The table also includes the cable kit needed for field upgrades.

Field upgrades: When ordering either option part number as a field upgrade, you will also need to order the M.2 Cable Kit which includes the necessary cables to connect the M.2 modules to the server. For CTO orders, the cable kit is not required; the cable and brackets are automatically included in the order. For field upgrades, you will also need to order the performance fans if they are not already installed in your server. See the [Cooling](#) section for ordering information.

Table 33. M.2 modules

Part number	Feature code	Description	Maximum supported	Windows 10/11 support
4Y37A09739	B5XH	ThinkSystem M.2 SATA 2-Bay RAID Enablement Kit	1	No
4Y37A09738	B5XJ	ThinkSystem M.2 SATA/NVMe 2-Bay Enablement Kit	1	Supported
4X97A59730	None	ThinkSystem SR635/SR655 M.2 Cable Kit (only needed for field upgrade to add 4Y37A09739 or 4Y37A09738) • Bracket to mount the M.2 module • Bracket for two supercap modules • M.2 signal/power cable	1	Supported

Supported drives are listed in the [Internal drive options](#) section.

The SATA RAID Enablement Kit has the following features:

- Supports one or two SATA M.2 drives
- Support 42mm, 60mm and 80mm drive form factors (2242, 2260 and 2280)
- RAID support via an onboard Marvell 88SE9230 SATA RAID Controller
- Support JBOD, RAID-0 and RAID-1 (RAID support requires two M.2 drives)
- PCIe 2.0 x2 host interface; 6Gbps SATA connection to the drives
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools

The SATA/NVMe Enablement Kit has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- When two drives installed, they must be either both SATA or both NVMe
- Support 42mm, 60mm and 80mm drive form factors (2242, 2260 and 2280)
- JBOD support only; no RAID support

- Either 6Gbps SATA or PCIe 3.0 x1 interface to the drives depending on the drives installed
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools

For further details about M.2 components, see the *ThinkSystem M.2 Drives and M.2 Adapters* product guide:
<https://lenovopress.com/lp0769-thinksystem-m2-drives-adapters>

Controllers for internal storage

The SR655 offers a variety of controller options for internal drives:

- Onboard SATA ports for up to 16 SATA drives
- RAID adapters and HBAs for SAS/SATA drives
- Onboard NVMe ports (for up to 16 NVMe drives)
- NVMe adapters for configurations of 20 or more NVMe drives

The server also supports [M.2 adapters](#) for boot drives.

The following table lists the adapters used for the internal storage of the server.

Table 34. Internal Storage adapter support

Part number	Feature code	Description	Power module (supercap)	Slots supported	Max qty	Windows 10/11 support
SAS/SATA RAID - PCIe 3.0						
7Y37A01082	AUNG	ThinkSystem RAID 530-8i PCIe 12Gb Adapter	No	9,1-6	4	No
4Y37A78834	BMFT	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter	No	9,1-6	4	Supported
7Y37A01083*	AUNH*	ThinkSystem RAID 730-8i 1GB Cache PCIe 12Gb Adapter	No	9,1-6	3	No
4Y37A09722	B4RQ	ThinkSystem RAID 730-8i 2GB Flash PCIe 12Gb Adapter	Included	9,1-6	3	No
7Y37A01084	AUNJ	ThinkSystem RAID 930-8i 2GB Flash PCIe 12Gb Adapter	Included	9,1-6	3	No
7Y37A01085	AUNK	ThinkSystem RAID 930-16i 4GB Flash PCIe 12Gb Adapter	Included	1-6	1	No
4Y37A09721	B31E	ThinkSystem RAID 930-16i 8GB Flash PCIe 12Gb Adapter	Included	1-6	1	No
7Y37A01086	AUV1	ThinkSystem RAID 930-24i 4GB Flash PCIe 12Gb Adapter	Included	1-5**	1	No
SAS/SATA RAID - PCIe 4.0 (No support for Tri-Mode)						
4Y37A09728	B8NY	ThinkSystem RAID 940-8i 4GB Flash PCIe Gen4 12Gb Adapter	Included	9,1-6	3	Supported
4Y37A78600	BM35	ThinkSystem RAID 940-16i 4GB Flash PCIe Gen4 12Gb Adapter	Included	1-6	1	Supported
4Y37A09733	B8P8	ThinkSystem RAID 940-32i 8GB Flash PCIe Gen4 12Gb Adapter	Included	1-5**	1	No
SAS/SATA HBA						
7Y37A01088	AUNL	ThinkSystem 430-8i SAS/SATA 12Gb HBA	No	9,1-6	4	No
7Y37A01089	AUNM	ThinkSystem 430-16i SAS/SATA 12Gb HBA	No	1-6	2	No
SAS/SATA HBA - PCIe 4.0						
4Y37A78601	BM51	ThinkSystem 440-8i SAS/SATA PCIe Gen4 12Gb HBA	No	9,1-6	4	No
4Y37A78602	BM50	ThinkSystem 440-16i SAS/SATA PCIe Gen4 12Gb HBA	No	1-6	2	No
NVMe Adapters						

Part number	Feature code	Description	Power module (supercap)	Slots supported	Max qty	Windows 10/11 support
4C57A65446	B98C	ThinkSystem 4-Port PCIe Gen4 NVMe Retimer Adapter	No	1,4,5	3	No
4Y37A09737	B8P5	ThinkSystem 1611-8P PCIe Gen4 Switch Adapter	No	1,5	2	No
4Y37A09719	B22D	ThinkSystem 810-4P NVMe Switch Adapter	No	1,4,5,6	4	No
7Y37A01081	BA4N	ThinkSystem 1610-4P NVMe Switch Adapter	No	1,4,5	3	No

* The RAID 730-8i 1GB Cache adapter is not available in USA and Canada.

** When 4x3.5" rear drive bays are configured, the 930-24i or 940-32i can only be installed in slot 3. When 4x2.5" rear drive bays are configured, the 930-24i or 940-32i can only be installed in slots 1 or 2.

For a comparison of the functions of the supported storage adapters, see the ThinkSystem RAID Adapter and HBA Reference:

<https://lenovopress.com/lp1288#sr655-support=SR655>

Configuration notes:

- **Mixing of adapter families not supported:** It is not supported to have a configuration with a mix of X30 and X40 adapter families. For example, you cannot build a configuration with a 930 RAID adapter and 940 RAID adapter.
- **Tri-Mode not supported:** In the SR655, the Tri-Mode (Trimode) feature of the RAID 940-8i and 940-16i adapters (support for NVMe U.3 drives) is not supported.
- **Gen 3 NVMe Switch Adapters and Gen 4 NVMe drives:** The 810-4P and 1610-4P NVMe Switch Adapters operate at PCIe 3.0 speeds. When PCIe 4.0 NVMe drives are attached to an NVMe Switch Adapter, the drives will only operate at PCIe 3.0 speeds.
- **M.2 and onboard SATA:** If you are configuring M.2 and onboard SATA, then at most 12 SATA drives can be connected.
- **Field upgrades:** If you are adding a RAID adapter to the SR655 as a field upgrade, you may need a Supercap Installation Kit as described in the [Field upgrades](#) section.
- **RAID 530-8i firmware:** If you plan to use the RAID 530-8i in the SR655, it must have firmware 50.3.0-1032 or later applied before it can be used in the server. If the adapter you plan to use has older firmware (for example, you are using an adapter you previously purchased), it must first be upgraded by installing it in another server and upgrading the firmware there. For more information, see [Support tip HT509177](#).

For more information about the adapters see the product guides in the RAID adapters or HBA sections of the Lenovo Press web site:

<https://lenovopress.com/servers/options/raid>

<https://lenovopress.com/servers/options/hba>

Internal drive options

The following tables list the drive options for internal storage of the server.

2.5-inch hot-swap drives:

- [2.5-inch hot-swap 12 Gb SAS HDDs](#)
- [2.5-inch hot-swap 6 Gb SATA HDDs](#)
- [2.5-inch hot-swap 24 Gb SAS SSDs](#)
- [2.5-inch hot-swap 12 Gb SAS SSDs](#)
- [2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)
- [2.5-inch hot-swap PCIe 3.0 NVMe SSDs](#)

3.5-inch hot-swap drives:

- [3.5-inch hot-swap 12 Gb SAS HDDs](#)
- [3.5-inch hot-swap 6 Gb SATA HDDs](#)
- [3.5-inch hot-swap 24 Gb SAS SSDs](#)
- [3.5-inch hot-swap 12 Gb SAS SSDs](#)
- [3.5-inch hot-swap 6 Gb SATA SSDs](#)
- [3.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)
- [3.5-inch hot-swap PCIe 3.0 NVMe SSDs](#)

M.2 drives:

- [M.2 SATA drives](#)

M.2 drive support: The use of M.2 drives requires an additional adapter as described in the [M.2 drives](#) subsection.

SED support: The tables include a column to indicate which drives support SED encryption. The encryption functionality can be disabled if needed. Note: Not all SED-enabled drives have "SED" in the description.

Table 35. 2.5-inch hot-swap 12 Gb SAS HDDs

Part number	Feature code	Description	SED support	Max Qty	Win 10/11 Support
2.5-inch hot-swap HDDs - 12 Gb SAS 15K

Internal backup units

The server does not supports any internal backup units, such as tape drives or RDX drives. External backup units are available as described in the [External backup units](#) section.

Optical drives

The server supports the external USB optical drive listed in the following table.

Table 50. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, DVD-R DL, CD-RW, CD-R, CD-ROM.

I/O expansion

The server supports a total of up to 9 PCIe 4.0 slots (8 with rear access, 1 internal for a RAID adapter or HBA) plus a dedicated OCP 3.0 SFF slot for networking. Slot availability is based on riser selection.

Slot length is dependent on the use of a mid-chassis drive cage: If the mid drive cage is present then slots are half-length; if the mid drive cage is not present, then slots are full-length.

The following figure shows the locations of the rear-accessible slots for each configuration selection. The OCP slot is located in the lower-left corner.

Figure 10. SR655 slots

The slots and riser cards are as follows:

- Riser 1: Slots 1, 2 and 3 - all FHHL or FHFL (16 or 32 lanes)
 - Option 1*: x16, x8, x8 (all physically x16 slots)
 - Option 2*: x16, x16, NC (slot 3 not connected)
 - Option 3: NC, NC, x16 (1U riser; slot 1 and slot 2 not connected)
 - Option 4: x16, NC, NC (slot 2 and slot 3 not connected)
- Riser 2: Slots 4, 5, and 6 - slot size varies (32 lanes)
 - Option 1: x16, x8, x8 (all physically x16 slots)
 - Option 2: x16, x16, NC (slot 6 not connected)
 - Option 3: NC, NC, x16 (1U riser; slot 4 and slot 5 not connected)
- Riser 3: Slots 7 and 8 - both FHHL or FHFL (16 or 32 lanes)

- Option 1*: x8, x8 (both physically x16 slots)
- Option 2*: x16, x16
- Slot 9: Internal PCIe 4.0 x8 low-profile slot for internal drive controller (physically a x16 slot)*

* The use of 32 lanes with Riser 1 or the use of Riser 3 or Slot 9 imposes restrictions on the use of the onboard SATA controller or the use of the M.2 Module or both. See the [Riser restrictions table](#) below for details.

The riser cards used to provide the above slot combinations are listed in the following table.

Table 51. Riser card selections

Purpose (NC = Not connected)	Part number	Feature code	Description
Riser 1 (slots 1,2,3)			
Option 1 - x16,x8,x8	4XH7A09838	B5VX	ThinkSystem SR655 x16/x8/x8 PCIe Riser1

Internal (slot 9)			
Internal slot - x8	4XH7A09843§	B5VW	ThinkSystem SR635/SR655 x8 PCIe Internal Riser

† Not supported with the NVIDIA A100 GPU

* Option part number 4XF7A72373 and 4XH7A09842 includes the GPU power cable

§ Option part number 4XH7A09843 includes a bracket to hold two RAID adapter flash power modules (supercaps)

As described in this section, the use of some risers results in limitations on the use of NVMe drives, the onboard SATA controller, and M.2 drives. This is due to the dual use of some of the PCIe slimline connectors on the system board - use with riser cards and use with these other functions. The following table summarizes the restrictions.

Tip: The drive bay restrictions in the table refer to the front drive bays.

Table 52. Restrictions on NVMe, onboard SATA and M.2 with riser selection

Purpose (NC = Not connected)	Description	NVMe restrictions (front bays)	Onboard SATA restrictions (front bays)	M.2 restrictions
Riser 1 (slots 1,2,3)				

Purpose (NC = Not connected)	Description	NVMe restrictions (front bays)	Onboard SATA restrictions (front bays)	M.2 restrictions
Option 1 x16,x8,x8	ThinkSystem SR655 x16/x8/x8 PCIe Riser1, B5VX	3.5-inch bays: No restriction 2.5-inch bays: 8 NVMe drives max	3.5-inch bays: 8 drives max 2.5-inch bays: No support	No restriction
Option 2 x16,x16,NC	ThinkSystem SR655 x16/x16 PCIe Riser1, B5VZ	3.5-inch bays: No restriction 2.5-inch bays: 8 NVMe drives max	3.5-inch bays: 8 drives max 2.5-inch bays: No support	No restriction
Option 3 NC,NC,x16	ThinkSystem SR635/SR655 x16 PCIe Riser1, B5VV	No restriction	No restriction	No restriction
Option 4 x16,NC,NC	ThinkSystem SR655 x16 PCIe 2U Riser 1, B69R	No restriction	No restriction	No restriction
Riser 2 (slots 4,5,6)				
Option 1 x16,x8,x8	ThinkSystem SR655 x16/x8/x8 PCIe Riser2, B5VU	No restriction	No restriction	No restriction
Option 2 x16,x16,NC	ThinkSystem SR655 x16/x16 PCIe Riser2, B5VY	No restriction	No restriction	No restriction
Option 3 NC,NC,x16	ThinkSystem SR635/SR655 x16/x16 PCIe Riser2 (BF), B5W0	No restriction	No restriction	No restriction
Riser 3 (slots 7,8)				
Option 1 x8,x8	ThinkSystem SR655 x8/x8 PCIe Riser3, B5VT	3.5-inch bays: No NVMe support 2.5-inch bays: No NVMe support	No restriction	No restriction
Option 2 x16,x16	ThinkSystem SR655 x16/x16 PCIe Riser3, B5W1	3.5-inch bays: No NVMe support 2.5-inch bays: No NVMe support	3.5-inch bays: 8 drives max 2.5-inch bays: 8 drives max	No M.2 support
Internal (slot 9)				
Internal slot x8	ThinkSystem SR635/SR655 x8 PCIe Internal Riser, B5VW	3.5-inch bays: No restriction 2.5-inch bays: 8 NVMe drives max	No restriction	No restriction

The choice of riser also determine which rear drive bays are possible, as listed in the following table.

Table 53. Use of rear drive bays with riser cards

Purpose (NC = Not connected)	Description	Riser can be used with:		
		Without rear bays	3.5-inch rear bays	2.5-inch rear bays
Riser 1 (slots 1,2,3)				
Option 1 - x16,x8,x8	ThinkSystem SR655 x16/x8/x8 PCIe Riser1, B5VX	Yes	No	Yes
Option 2 - x16,x16,NC	ThinkSystem SR655 x16/x16 PCIe Riser1, B5VZ	Yes	No	Yes
Option 3 - NC,NC,x16	ThinkSystem SR635/SR655 x16 PCIe Riser1, B5VV	No	Yes	No
Option 4 - x16,NC,NC	ThinkSystem SR655 x16 PCIe 2U Riser 1, B69R	Yes	No	Yes
Riser 2 (slots 4,5,6)				
Option 1 - x16,x8,x8	ThinkSystem SR655 x16/x8/x8 PCIe Riser2, B5VU	Yes	No	Yes
Option 2 - x16,x16,NC	ThinkSystem SR655 x16/x16 PCIe Riser2, B5VY	Yes	No	Yes
Option 3 - NC,NC,x16	ThinkSystem SR635/SR655 x16/x16 PCIe Riser2 (BF), B5W0	No	Yes	No
Riser 3 (slots 7,8)				
Option 1 - x8,x8	ThinkSystem SR655 x8/x8 PCIe Riser3, B5VT	Yes	No	No
Option 2 - x16,x16	ThinkSystem SR655 x16/x16 PCIe Riser3, B5W1	Yes	No	No
Internal (slot 9)				
Internal slot - x8	ThinkSystem SR635/SR655 x8 PCIe Internal Riser, B5VW	Yes	Yes	Yes

Network adapters

The server has a dedicated OCP 3.0 SFF slot with PCIe 4.0 x16 host interface. See [Figure 3](#) for the location of the OCP slot.

The following table lists the supported OCP adapters. One port can optionally be shared with the ASPEED management processor for Wake-on-LAN and NC-SI support. Only 1 OCP card can be installed in the server.

280W processor support: There are some restrictions regarding the use of some OCP adapters with a 280W processor installed due to thermal restrictions. See the [Operating environment](#) section for details.

Table 54. Supported OCP adapters

Part number	Feature code	Description	Windows 10/11 support
Gigabit Ethernet			
4XC7A08235	B5T1	ThinkSystem Broadcom 5719 1GbE RJ45 4-port OCP Ethernet Adapter	Supported

16x 2.5-inch NVMe	6x Either fan	6x Either fan	6x Either fan
24x 2.5-inch NVMe	6x Either fan	6x Performance fan	6x Performance fan
8x 2.5-inch NVMe + 8x 2.5-inch SAS/SATA	6x Either fan	6x Either fan	6x Either fan
8x 2.5-inch NVMe + 16x 2.5-inch SAS/SATA	6x Either fan	6x Performance fan	6x Performance fan

Installation & removal: Before installing or removing an OCP adapter, power off your server and disconnect power cords first. See [Support tip HT509768](#) for details.

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:

<https://lenovopress.com/servers/options/ethernet>

The following table lists additional supported network adapters that can be installed in the regular PCIe slots.

Table 56. Supported PCIe Network Adapters

Part number	Feature code	Description	Slots supported	Max qty	Windows 10/11 support

* For these adapters, high performance cooling fans must be installed. See the [Cooling](#) section for details.

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:

<https://lenovopress.com/servers/options/ethernet>

Fibre Channel host bus adapters

The following table lists the Fibre Channel HBAs supported by the SR655.

Note that the Emulex LPe35000 adapters are supported either with EPYC 7002 "Rome" processors or with EPYC 7003 "Milan" processors, as indicated in the table.

No Windows 10/11 support: None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 57. Fibre Channel HBAs

Part number	Feature code	Description	EPYC 7002	EPYC 7003	Slots supported	Max qty
64 Gb Fibre Channel HBAs						
4XC7A77485	BLC1	ThinkSystem Emulex LPe36002 64Gb 2-port PCIe Fibre Channel Adapter	Yes	Yes	1-2, 4-8	7
32 Gb Fibre Channel HBAs

External RAID adapters				
7Y37A01087	AUNQ	ThinkSystem RAID 930-8e 4GB Flash PCIe 12Gb Adapter	1,2,4,5,7	4*
4Y37A78836	BNWJ	ThinkSystem RAID 940-8e 4GB Flash PCIe Gen4 12Gb Adapter	1,2,4,5,7	4*

* See configuration rules below

For a comparison of the functions of the supported storage adapters, see the ThinkSystem RAID Adapter and HBA Reference:

<https://lenovopress.com/lp1288#sr655-support=SR655&internal-or-external-ports=External>

Configuration rules

The following configuration rules apply to the use of the RAID 930-8e and RAID 940-8e adapters and the flash power module (supercaps) that each adapter requires:

- If the 3.5-inch mid-chassis drive cage is configured, then the maximum number of flash power modules (and therefore the maximum number of 930/940-8e adapters) is 2
- If one or more GPUs are installed, then the maximum number of flash power modules and 930/940-8e adapters is 3.
- If any internal RAID adapters with flash power modules are installed, the maximum number of 930/940-8e adapters supported is further reduced by that number.

Mixing storage adapter families: The following HBA/RAID adapter combinations are supported:

- X30 external adapters with other X30 adapters (internal or external)
- X40 external adapters with other X40 adapters (internal or external)
- X40 external adapters with X350 internal adapters

The following HBA/RAID adapter combinations are *not* supported:

- X30 adapters (internal or external) with X40 adapters (internal or external)
- X30 adapters (internal or external) with X350 internal adapters

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters and RAID adapters categories:

<https://lenovopress.com/servers/options/hba>

<https://lenovopress.com/servers/options/raid>

Flash storage adapters

All PCIe Flash Storage adapters supported by the server are withdrawn from marketing.

The SR655 supports the PCIe Flash Storage adapters listed in the following table.

No Windows 10/11 support: None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 59. Flash Storage Adapters

Part number	Feature code	Description	Slots supported	Maximum supported
Mainstream NVMe PCIe Adapters - Optimized for mixed-intensive application workloads with an endurance of 3-5 DWPD.				
4XB7A38234	BCGJ	ThinkSystem HHHH Kioxia CM5-V 1.6TB Mainstream NVMe PCIe3.0 x4 Flash Adapter	1-8	6

4XB7A08521	B32M	ThinkSystem HHHH Toshiba CM5-V 3.2TB Mainstream NVMe PCIe 3.0 x4 Flash Adapter	1-8	6

For details about these adapters, see the Lenovo Press product guides in the Flash Adapters category:
<https://lenovopress.com/servers/options/ssdadapter>

Configuration rules

The following configuration requirements must be met when installing flash storage adapters:

- GPU adapters are not supported.
- Processor TDP greater than 155W is not supported
- Ambient temperature 35 °C or lower
- Performance fans are required and will be derived by the configurator for configure-to-order builds.
- When adding Flash adapters as field upgrades, you will be required to replace all standard fans with performance fan modules. The ordering part number is listed in the following table - you will be required to order 6 fans.

Table 60. Performance fan upgrade for Flash adapters

Part number	Feature code	Description	Maximum Supported
4F17A14484	B5W3	ThinkSystem SR655 Performance Fan Module	6

GPU adapters

The SR655 supports the following graphics processing units (GPUs).

Table 61. Supported GPUs

Part number	Feature code	Description	Slots supported	Max Qty	Win 10/11 support

4X67A11584	B31D	ThinkSystem NVIDIA Quadro P620 2GB PCIe Active GPU	1,2,4,5,7,8	6	No

* When installed, the adjacent slot (2, 5, or 8 respectively) will not be usable

** 8x NVIDIA T4 are supported via Special Bid

† The MI210 is supported only with EPYC 7003 "Milan" processors. Not supported with EPYC 7002 "Rome" processors

‡ The RTX A6000, RTX A4500, and RTX A2000 are currently only supported with Windows 10/11 orders.

For information about these GPUs, see the ThinkSystem GPU Summary, available at:

<https://lenovopress.com/lp0768-thinksystem-thinkagile-gpu-summary>

The following figure shows the slots where double-wide (top image) and single-wide (bottom) are installed.

Figure 11. Slots used for GPUs

Configuration rules

The following configuration requirements must be met when installing GPUs:

- Some NVIDIA A Series GPUs are available as two feature codes, one with a CEC chip and one without a CEC chip (ones without the CEC chip have "w/o CEC" in the name). The CEC is a secondary Hardware Root of Trust (RoT) module that provides an additional layer of security, which can be used by customers who have high regulatory requirements or high security standards. NVIDIA uses a multi-layered security model and hence the protection offered by the primary Root of Trust embedded in the GPU is expected to be sufficient for most customers. The CEC defeatured products still offer Secure Boot, Secure Firmware Update, Firmware Rollback Protection, and In-Band Firmware Update Disable. Specifically, without the CEC chip, the GPU does not support Key Revocation or Firmware Attestation. CEC and non-CEC GPUs of the same type of GPU can be mixed in field upgrades.
- All GPUs installed must be identical
- Double-wide GPUs are installed in the top slots of each riser (see [I/O expansion](#) for the location of the risers and slots). The adjacent slots are not available for use.
- For double-wide GPUs and the T4 GPU, the following front drive bay restrictions apply:
 - Maximum of 8x 3.5-inch front drive bays supported (12 bays not supported)
 - Maximum of 16x 2.5-inch front drive bays supported (24 bays not supported)
- Rear drive bays and mid-chassis drive bays are not supported.
- Flash storage adapters are not supported.
- 1600W power supplies (or in some configurations, 1100W power supplies) are required.
- Processor TDP and ambient temperature limitations are listed in the following table.

Table 62. Processor and thermal requirements for GPUs

GPUs installed	Front drive bays	Maximum processor TDP	Maximum ambient temperature
6x T4 GPUs	8x 3.5-inch SAS/SATA	200W	35°C
6x T4 GPUs	8x 3.5-inch SAS/SATA	280W (no restriction)	30°C
6x T4 GPUs	8x 2.5-inch SAS/SATA 16x 2.5-inch SAS/SATA	280W (no restriction)	35°C

GPUs installed	Front drive bays	Maximum processor TDP	Maximum ambient temperature
6x P620 GPUs	8x 3.5-inch SAS/SATA 12x 3.5-inch SAS/SATA 8x 2.5-inch SAS/SATA 16x 2.5-inch SAS/SATA 24x 2.5-inch SAS/SATA	240W	35°C
3x double-wide GPUs	8x 3.5-inch SAS/SATA 8x 2.5-inch SAS/SATA 16x 2.5-inch SAS/SATA	280W (no restriction)	30°C

When GPUs are installed, the necessary riser cards will be derived. The following table shows the riser cards for double-wide GPUs. In such a configuration, slots 1, 4, 7 are x16 used by the GPUs, slots 2, 5, 8 are inaccessible. The remaining slots 3 and 6 are available for x8 adapters.

NVIDIA A100 support: When installing an NVIDIA A100 GPU as a field upgrade to either Slot 4 or Slot 7, Riser 2 Kit V2 (4XF7A72372) or Riser 3 Kit V2 (4XF7A72373) is required. The previous riser kits (4XH7A09840 or 4XH7A09842, now withdrawn) are not supported.

Table 63. Riser cards for double-wide GPUs

Riser choice	Part number	Feature code	Description
Riser 1: x16,NC,NC	4XH7A09834	B69R	ThinkSystem SR655 x16 PCIe 2U Riser 1
Riser 2: x16,x8,x8	4XF7A72372	B5VU	ThinkSystem SR655 x16/x8/x8 PCIe Riser 2 FH/LP Kit V2
	4XH7A09840	B5VU	ThinkSystem SR655 x16/x8/x8 PCIe Riser2*
Riser 3: x16,x16	4XF7A72373	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser 3 Kit V2
	4XH7A09842	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser3*

* Not supported with the NVIDIA A100 GPU

The following table shows the riser cards for 6x single-wide GPUs. With 6 GPUs installed, slots 1, 2, 4, 5, 7, 8 are x16 slots used by the GPUs. The remaining slots 3 and 6 are not connected.

Table 64. Riser cards for 6x single-wide GPUs

Riser choice	Part number	Feature code	Description
Riser 1: x16,x16,NC	4XH7A09837	B5VZ	ThinkSystem SR655 x16/x16 PCIe Riser1
Riser 2: x16,x16,NC	4XH7A09839	B5VY	ThinkSystem SR655 x16/x16 PCIe Riser2
Riser 3: x16,x16	4XF7A72373	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser 3 Kit V2
	4XH7A09842	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser3

Under Special Bid conditions, the server supports 8x NVIDIA T4 GPUs. The following table shows the riser cards for 8x NVIDIA T4 GPUs. With 8 GPUs installed, all rear PCI slots (slots 1-8) are used by the GPUs. Note that four of the GPUs are connected using x8 host interfaces.

Table 65. Riser cards for 8x single-wide GPUs (Special Bid only)

Riser choice	Part number	Feature code	Description
Riser 1: x16,x8,x8	4XH7A09838	B5VX	ThinkSystem SR655 x16/x8/x8 PCIe Riser1
Riser 2: x16,x8,x8	4XF7A72372	BFV6	ThinkSystem SR655 x16/x8/x8 PCIe Riser 2 FH/LP Kit V2
	4XH7A09840	B5VU	ThinkSystem SR655 x16/x8/x8 PCIe Riser2
Riser 3: x16,x16	4XF7A72373	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser 3 Kit V2
	4XH7A09842	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser3

GPU field upgrades

A cooling kit, DIMM fillers and auxiliary power cable kits may be required for GPU field upgrades.

When ordering GPUs as part of a CTO configuration, the necessary cooling features are automatically selected as part of the order. However when ordering the GPUs as field upgrades, you will need to also order the necessary thermal kit. One part number is needed per server.

- 4H47A38664 is for NVIDIA T4 upgrades
- 4H47A38663 is for V100/V100S GPU upgrades

NVIDIA P620 GPUs: A thermal kit is not required when installing NVIDIA Quadro P620 GPUs.

Table 66. Field upgrade kits for GPUs

Part number	Description	Quantity required
4H47A38664	ThinkSystem SR655 Option T4 GPU Upgrade and Thermal Kit • 1U Performance Heatsink (replaces existing heatsink) • 6x Performance fans (replaces existing fans) • GPU air baffle • 3x additional air baffles for NVIDIA T4 GPUs Tip: Some components may not be needed in certain configurations. Consult the SR655 Setup Guide for information.	1
4H47A38663	ThinkSystem SR655 Option GPU Upgrade and Thermal Kit • 1U Performance Heatsink (replaces existing heatsink) • 6x Performance fans (replaces existing fans) • GPU air baffle • 3x additional air baffles (only needed for FHHL adapters)	1

When a GPU is added as a field upgrade, all empty DIMM slots must have a dummy DIMM blank installed in each DIMM slot, to ensure the optimal air flow. Ordering information is in the following table.

Table 67. ThinkSystem Dummy DIMM Kit

Part number	Description	Quantity required
4M27A11810	ThinkSystem Dummy DIMM Package Kit (contains 24 dummy memory DIMMs)	1

When ordering double-wide GPUs as part of a CTO configuration, the necessary auxiliary power cables are automatically selected as part of the order. However when ordering the GPUs as field upgrades, you will need to also order the power cable separately. One part number contains 3 cables and only 1 needed per server.

Note: The T4 and P620 GPUs do not require an auxiliary power cable.

Table 68. GPU auxiliary power cable kit

Part number	Description	Quantity required
4X97A59853	ThinkSystem SR655 GPU Cable Kit • 2x 350mm GPU Power Cable (GPU in Riser 1 or 2) (SBB7A14640) • 1x 250mm GPU Power Cable (GPU in Riser 3) (SBB7A10974)	1

Cooling

The SR655 server has six 60 mm single-rotor hot-swap variable-speed fans and either 5 or 6 fans are standard depending on the configuration. The server offers N+1 redundancy, meaning that one fan can fail and the server still operates normally. The server also has one additional fan integrated in each of the two power supplies.

Under all of the following conditions, only 5 fans are required:

- No M.2 Module
- No internal riser slot
- No mid drive bays
- No GPUs
- No flash storage adapter
- No Riser 3

For all other configurations, all 6 fans are required. For fan requirements for OCP adapters, see the table in the [Network adapters](#) section

Table 69. Fan ordering information

Part number	Feature code	Description	Maximum supported
4F17A14485	B5W4	ThinkSystem SR655 2U Fan Module	6
4F17A14484	B5W3	ThinkSystem SR655 Performance Fan Module	6

Some configurations, such as the use of high-TDP processors or the addition of mid drive bays, rear drive bays, GPUs, flash storage adapters, M.2 drives, or Ethernet adapters of 100 GbE or higher, or Ethernet adapters of 4-port 10GbE or 10/25GbE or higher, will require the use of higher-RPM performance fans and an upgraded processor heatsink.

For configure-to-order builds, the DCSC configurator will automatically select the required components. For field upgrades, the option part numbers may include the upgraded components when they are needed, or you may need to order the performance fans separately.

See these sections for details:

- [Drive bay upgrade kits](#)
- [OCP adapters](#)
- [GPU upgrade kits](#)
- [Flash storage adapters](#)
- [PCIe network adapters](#)

Power supplies

The server supports up to two redundant hot-swap power supplies.

The power supply choices are listed in the following table. Both power supplies used in server must be identical.

Tip: Use Lenovo Capacity Planner to determine exactly what power your server needs:
<https://datacentersupport.lenovo.com/us/en/solutions/lnvo-lcp>

Table 70. Power supply options

Part number	Feature code	Description	Maximum supported	110V AC	220V AC	240V DC China only	-48V DC
AC power input

-48V DC input power							
4P57A15363*	B4Z5*	ThinkSystem 1100W -48V DC Power Supply	2	No	No	No	Yes

* -48V DC power supply is only available via Special Bid

Dual-voltage power supplies are auto-sensing and support both 110V AC (100-127V 50/60 Hz) and 220V AC (200-240V 50/60 Hz) power. For China customers, all AC power supplies support 240V DC.

All supported AC power supplies have a C14 connector. The -48V DC power supply has a Positronic PLB3W3M1000/AA connector.

Power supply options do not include a line cord.

For server configurations, the inclusion of a power cord is model dependent. Configure-to-order models can be configured without power cords if desired.

Power cords (C13 connectors)

Line cords and rack power cables with C13 connectors can be ordered as listed in the following table.

115V customers: If you plan to use the 1100W power supply with a low-range (100-127V) power source, select a power cable that is rated above 10A. Power cables that are rated at 10A or below are not supported with low-range power.

Integrated virtualization

The server supports booting from an operating system or hypervisor installed on an M.2 solid-state drive. See the [M.2 drives section](#) for details and the list of available options.

You can download supported VMware vSphere hypervisor images from the following web page and load it on the M.2 drive using the instructions provided:

https://vmware.lenovo.com/content/custom_iso/

Systems management

The server contains an integrated service processor which provides advanced control, monitoring, and alerting functions. The service processor is based on the ASPEED AST2500 baseboard management controller (BMC).

Local management

The SR655 offers a front operator panel with key LED status indicators, as shown in the following figure.

Tip: The Network LED only shows network activity of the installed OCP network adapter.

Figure 12. Front operator panel

The server offers light path diagnostics. If an environmental condition exceeds a threshold or if a system component fails, the ASPEED service processor lights LEDs inside the server to help you diagnose the problem and find the failing part. The SR655 has fault LEDs next to the following components:

- Each memory DIMM
- Each drive bay
- Each system fan
- Each power supply

The front of the server also houses an information pull-out tab (also known as the network access tag). See [Figure 2](#) for the location. A label on the tab shows the network information (MAC address and other data) to remotely access the service processor.

Remote management

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0

- Simple Network Management Protocol (SNMP) Version 3 (traps and gets)
- Redfish support to the Redfish Schema 2018.1 (DMTF DSP0266 1.5.0 compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for the device being used - laptop, tablet, phone) with NLS support

Remote connectivity is provided by a dedicated 1Gb Ethernet management port (see the locations of ports at the rear of the server in the [Components and connectors](#) section). Remote management can also be performed via the first port of the installed OCP adapter using the shared management capability of the adapter via NC-SI. NC-SI connectivity is 10/100 Mbps Ethernet.

IPMI via the Ethernet port (IPMI over LAN) is supported, however it is disabled by default. For CTO orders you can specify whether you want the feature enabled or disabled in the factory, using the feature codes listed in the following table.

Table 73. IPMI-over-LAN settings

Part number	Feature code	Description
CTO only	B7XZ	Disable IPMI-over-LAN (default)
CTO only	B7Y0	Enable IPMI-over-LAN

A virtual presence (iKVM remote control and virtual media) capability also comes standard in the server for remote server management.

The remote control functions include the following:

- Remotely viewing video with graphics resolutions up to 1920x1080 at 60 Hz and 32 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- Full remote administration with seamless access from UEFI POST through to operating system load
- OS independent - no drivers or OS agents required
- Support for up to four remote users simultaneously

The remote media functions include:

- USB 2.0 compliant connectivity
- Up to four simultaneously mounted diskette, HDD, CD, DVD, USB flash drive, or image files
- Optional encryption on connections
- Requires Java Runtime Environment (JRE) 1.4.2 or later
- Can be used as a boot device
- Persistent session across system reset (but not across AC power loss)

Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions. Lenovo XClarity Administrator provides agent-free hardware management for ThinkSystem servers, in addition to other Lenovo servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

On the SR655, XClarity Administrator v3.2.0 or later is required for full firmware-update support, managed authentication, and remote control. The baseboard management controller firmware should be v3.56 or later.

Lenovo XClarity Administrator supports the following functions on the SR655:

- Asset management
- Hardware monitoring
- Hardware management
- Configuration management
- Firmware compliance and updates
- Device authentication using an LDAP server
- Remote control
- Warranty status
- Automatic problem notification (call home)

For details of these functions, see the paper *Introduction to Managing ThinkSystem SR635 and SR655 Servers with Lenovo XClarity Administrator*, available from <https://lenovopress.com/lp1419>

The following functions are not supported:

- Network interfaces using IPv6 link-Local Address (LLA) (only IPv4 addresses and global unicast IPv6 address are supported)
- Server configuration other than BIOS configuration using configuration patterns
- Windows OS device driver updates
- Operating system deployment
- Virtually reseating a server
- Single sign-on to the management controller interface

For more information about Lenovo XClarity Administrator, including ordering part numbers, see the Lenovo XClarity Administrator Product Guide: <https://lenovopress.com/tips1200-lenovo-xclarity-administrator>

Lenovo XClarity Provisioning Manager Lite

Lenovo XClarity Provisioning Manager Lite (LXPM Lite) v2 is an embedded application for system setup and firmware upgrades. The tool is accessed during system boot by pressing F11 when prompted.

The software tool provides the following functions:

- Easy-to-use, language-selectable graphical interface
- Integrated help system
- Automatic hardware detection
- Ability to install an operating system and device drivers either in an unattended mode or manually
- Ability to clone the settings in one server to other similarly configured Lenovo servers
- Supports RAID setup
- Diagnostics for memory test, hard disk drive test, and RAID log collection.

The LXPM Lite user interface is shown in the following figure.

Figure 13. Lenovo XClarity Provisioning Manager Lite user interface (pre-production server)

For more information about LXPM Lite, see the following support page:

<https://datacentersupport.lenovo.com/us/en/solutions/HT507133>

Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- **Lenovo Essentials OneCLI**

OneCLI is a collection of server management tools that uses a command line interface program to manage firmware, hardware, and drivers. It provides functions to collect full system health information (including health status), configure system settings, update BMC/UEFI firmware (in-band and out-of-band), and update drivers.

Note: OneCLI on the SR655 currently does not support firmware update of adapters. For UEFI settings, all OneCLI commands are supported. For BMC settings, OneCLI support is limited to network, ntp, dns, account commands and the following VPD parameters: VPD.Model, VPD.SerialNumber, VPD.AssetId, VPD.UUID.

- **Lenovo Essentials UpdateXpress**

The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.

Note: UpdateXpress on the SR655 is currently limited to only support BMC and UEFI firmware updates.

- **Lenovo Essentials Bootable Media Creator**

The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page:

<http://support.lenovo.com/us/en/documents/LNVO-center>

Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager provides a stand-alone, web-based agent-less power management console that provides real time data and enables you to observe, plan and manage power and cooling for Lenovo servers. Using built-in intelligence, it identifies server power consumption trends and ideal power settings and performs cooling analysis so that you can define and optimize power-saving policies.

Lenovo XClarity Energy Manager offers the following capabilities:

- Monitors room, row, rack, and device levels in the data center
- Reports vital server information, such as power, temperature and resource utilization
- Monitors inlet temperature to locate hot spots, reducing the risk of data or device damage
- Provides finely-grained controls to limit platform power in compliance with IT policy
- Generates alerts when a user-defined threshold is reached

Note: In the SR655, system power capping function is not supported on Lenovo XClarity Energy Manager.

Lenovo XClarity Energy Manager is an optional software component that is licensed on a per managed node basis, that is, each managed server requires a license. To manage systems, a node license pack should be purchased. The following table lists the geo-specific Lenovo XClarity Energy Manager software license options.

Table 74. Lenovo XClarity Energy Manager software options

Description	Part number (NA, AP, Japan)*	Part number (EMEA, LA)**	Quantity
Lenovo XClarity Energy Manager, 1 Node w/ 1 Yr S&S	01DA225	01DA228	1

For more information, refer to the Lenovo XClarity Energy Manager web page:

<http://datacentersupport.lenovo.com/us/en/solutions/Invo-lxem>

Lenovo Capacity Planner is a power consumption evaluation tool that enhances data center planning by enabling IT administrators and pre-sales professionals to understand various power characteristics of racks, servers, and other devices. Capacity Planner can dynamically calculate the power consumption, current, British Thermal Unit (BTU), and volt-ampere (VA) rating at the rack level, improving the planning efficiency for large scale deployments.

For more information, refer to the Capacity Planner web page:

<http://datacentersupport.lenovo.com/us/en/solutions/Invo-lcp>

Security

The SR655 server offers the following security features:

- Administrator and power-on password
- Integrated Trusted Platform Module (TPM) supporting TPM 2.0
- Optional Nationz TPM 2.0, available only in China (CTO only)
- Optional chassis intrusion switch (CTO only)
- Optional lockable front security bezel

The server is NIST SP 800-147B compliant.

The optional lockable front security bezel is shown in the following figure and includes a key that enables you to secure the bezel over the drives and system controls thereby reducing the chance of unauthorized or accidental access to the server.

Figure 14. Lockable front security bezel

The dimensions of the security bezel are:

- Width: 437 mm (17.2 in.)
- Height: 87 mm (3.4 in.)
- Width: 23 mm (0.9 in.)

The following table lists the security options for the SR655.

Intrusion switch support: The intrusion switch is mounted on the Riser 2 cage. As a result, the intrusion switch requires a 2U riser in the Riser 2 position (either riser B5VU or B5VY). The intrusion switch is not supported if the server has 3.5-inch rear drive bays configured. The use of the intrusion switch with 2.5-inch rear drive bays requires a special bid (CORE) configuration.

Table 75. Security features

Part number	Feature code	Description
None*	B22N	ThinkSystem Nationz Trusted Platform Module v2.0 (China customers only)
None*	B9V3	ThinkSystem Intrusion Switch Cable
7Z17A02580	AURX	ThinkSystem 2U Security Bezel

* Not available as a field upgrade. The component is CTO or in pre-configured models only.

Rack installation

The following table lists the rack installation options that are available for the server.

The VGA Upgrade Kit allows you to upgrade your server by adding a VGA video port to the front of the server (if the server does not already come with a front VGA port). When the front VGA is in use, the rear VGA port is automatically disabled.

Table 76. Rack installation options

Option	Feature Code	Description
Optional front VGA port		
4XH7A83033	BMNL	ThinkSystem SR550/SR590/SR650 EIA Latch w/ VGA Upgrade Kit v2
7Z17A02578	B6XX	ThinkSystem 2U EIA Latch w/ VGA Upgrade Kit (adds a VGA port to the front of the server)
4-post rail kits		
	B42B	ThinkSystem Toolless Friction Rail v2
4M17A13564	BK7W	ThinkSystem Toolless Friction Rail v2
7M27A05702	AXCA	ThinkSystem Toolless Slide Rail
7M27A05700	AXCH	ThinkSystem Toolless Slide Rail Kit with 2U CMA
Cable management arm		
7M27A05698	B135	ThinkSystem 2U CMA Upgrade Kit for Toolless Slide Rail

The following table summarizes the rail kit features and specifications.

Table 77. Rail kit features and specifications summary

Feature	ThinkSystem Toolless Slide Rail	ThinkSystem Toolless Friction Rail v2
Part number	7M27A05702 (no CMA) 7M27A05700 (with CMA)	4M17A13564
Rail type	Full-out slide (ball bearing)	Half-out slide (friction)
Toolless installation	Yes	Yes
Cable Management Arm (CMA) support	Yes - Standard on 7M27A05700 - For 7M27A05702, use 7M27A05698	No
In-rack server maintenance	Yes	No
1U PDU support	Yes	Yes
0U PDU support	Limited*	Limited**
Rack type	Lenovo and IBM 4-post, IEC standard-compliant	Lenovo and IBM 4-post, IEC standard-compliant
Mounting holes	Square or round	Square or round
Mounting flange thickness	2 mm - 3.3 mm (0.08 - 0.13 in.)	2 mm - 3.3 mm (0.08 - 0.13 in.)
Distance between front and rear mounting flanges	610 mm - 864 mm (24 - 34 in.)	610 mm - 864 mm (24 - 34 in.)
Rail length***	730 mm (28.74 in.)	751 mm (29.6 in.)

* For 0U PDU support, the rack must be at least 1100 mm (43.31 in.) deep without a CMA, or at least 1200 mm (47.24 in.) deep if a CMA is used.

** For 0U PDU support with the friction rail kit, the rack must be at least 1000 mm (39.37 in.) deep.

*** Measured when mounted on the rack, from the front surface of the front mounting flange to the rear most point of the rail.

Rack shipment: The following restrictions apply when shipping the SR655 in a rack:

- No 2.5-inch rear drive bays
- No mid drive bays
- Maximum of 1x double-width GPU installed

Operating system support

Topics in this section:

- [EPYC 7003 support](#)
- [EPYC 7002 support](#)
- [VMware ESXi preload](#)
- [Windows 10 and Windows 11](#)

EPYC 7003 support

The SR655 with EPYC 7003 processors supports the following operating systems:

- Microsoft Windows 10 (x64)
- Microsoft Windows 11
- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Red Hat Enterprise Linux 8.3
- Red Hat Enterprise Linux 8.4
- Red Hat Enterprise Linux 8.5
- Red Hat Enterprise Linux 8.6
- Red Hat Enterprise Linux 8.7
- Red Hat Enterprise Linux 8.8
- Red Hat Enterprise Linux 8.9
- Red Hat Enterprise Linux 8.10
- Red Hat Enterprise Linux 9.0
- Red Hat Enterprise Linux 9.1
- Red Hat Enterprise Linux 9.2
- Red Hat Enterprise Linux 9.3
- Red Hat Enterprise Linux 9.4
- Red Hat Enterprise Linux 9.5
- Red Hat Enterprise Linux 9.6
- Red Hat Enterprise Linux 9.7
- Red Hat Enterprise Linux 9.8
- SUSE Linux Enterprise Server 12 SP5
- SUSE Linux Enterprise Server 12 Xen SP5

- VMware ESXi 8.0 U3

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide:

- SR655 with EPYC 7003: <https://lenovopress.com/osig#servers=sr655-7y00-7z01-epyc-7003>
- SR655 with EPYC 7002: <https://lenovopress.com/osig#servers=sr655-7y00-7z01-epyc-7002>

VMware ESXi preload

For configure-to-order configurations, the SR655 can be preloaded with VMware ESXi. Ordering information is listed in the following table.

Table 78. VMware ESXi preload

Part number	Feature code	Description
CTO only	B6U0	VMware ESXi 6.5 U3 (factory installed)
CTO only	B88T	VMware ESXi 6.7 U3 (factory installed)
CTO only	BHSR	VMware ESXi 7.0 U2 (Factory Installed)
CTO only	BMT5	VMware ESXi 8.0 (Factory Installed)
CTO only	BQ8S	VMware ESXi 8.0 U1 (Factory Installed)

Configuration rule:

- An ESXi preload cannot be selected if the configuration includes an NVIDIA GPU (ESXi preload cannot include the NVIDIA driver)

You can download supported VMware vSphere hypervisor images from the following web page and install it using the instructions provided:

https://vmware.lenovo.com/content/custom_iso/

Windows 10 and Windows 11

The SR655 can now run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, additional Base CTO models 7Z01CTO2WW and 7Y00CTO2WW have been created to assist building a configuration that can be used with the client operating systems. See the [Models](#) section for details.

The XClarity management toolset is supported with Windows 10 and Windows 11.

Windows client license: A Windows client license for the system cannot be ordered from Lenovo nor can the OS be preloaded on the system in the factory. For the Windows license and for preloads, please contact your Lenovo business partner. A Windows Pro license is required as a qualifying base OS license in order to use a client Volume License offering.

See the part number tables in the following sections to see which adapters are supported with Windows 10 and Windows 11:

- [Controllers for internal storage](#)
- [Internal drive options](#)
- [M.2 adapters](#)
- [Network adapters](#)
- [GPU adapters](#)

GPU recommended: Lenovo recommends that if you plan to install Windows 10 or 11 on this server to run graphics-intensive applications, then you should selected a dedicated graphics adapter (GPU).

The following components are *not* supported:

- SAS HDDs and SSDs
- Fibre Channel adapters
- InfiniBand adapters
- External storage adapters
- Flash storage adapters

Physical and electrical specifications

The SR655 has the following overall physical dimensions, excluding components that extend outside the standard chassis, such as EIA flanges, front security bezel (if any), and power supply handles:

- Width: 445 mm (17.5 inches)
- Height: 87 mm (3.4 inches)
- Depth: 764 mm (30.1 inches)

The following table lists the detailed dimensions. See the figure below for the definition of each dimension.

Table 79. Detailed dimensions

Dimension	Description
482 mm	X_a = Width, to the outsides of the front EIA flanges
435 mm	X_b = Width, to the rack rail mating surfaces
445 mm	X_c = Width, to the outer most chassis body feature
87 mm	Y_a = Height, from the bottom of chassis to the top of the chassis
698 mm	Z_a = Depth, from the rack flange mating surface to the rearmost I/O port surface
730 mm	Z_b = Depth, from the rack flange mating surface to the rearmost feature of the chassis body
730 mm	Z_c = Depth, from the rack flange mating surface to the rearmost feature such as power supply handle
34 mm	Z_d = Depth, from the forwardmost feature on front of EIA flange to the rack flange mating surface
47 mm	Z_e = Depth, from the front of security bezel (if applicable) or forwardmost feature to the rack flange mating surface

Figure 15. Server dimensions

The shipping (cardboard packaging) dimensions of the SR655 are as follows:

- Width: 592 mm (23.3 inches)
- Height: 282 mm (11.1 inches)
- Depth: 992 mm (39.1 inches)

Weight:

- Maximum weight: 35.4 kg (78.0 lb)

Electrical specifications for AC power supplies:

- Electrical - Input voltage
 - 100 - 127 (nominal) V AC, 50 Hz or 60 Hz
 - 200 - 240 (nominal) V AC, 50 Hz or 60 Hz
 - 180 - 300 V DC (China only)
- Inlet current:
 - 100-127 V:
 - 550W power supply: 6.2 A
 - 750W power supply: 8.4 A
 - 1100W power supply: 12 A
 - 200-240 V:
 - 550W power supply: 3.0 A
 - 750W power supply: 4.1 A
 - 1100W power supply: 6 A
 - 1600W power supply: 8.7 A

Electrical specifications for DC input power supply:

- Input voltage: -48 to -60 Vdc
- Inlet current (1100W power supply): 26 A

Operating environment

The ThinkSystem SR655 server complies with ASHRAE Class A2 specifications, and depending on the hardware configuration, also complies with ASHRAE Class A3 and Class A4 specifications. System performance may be impacted when operating temperature is outside ASHRAE A2 specification.

The restrictions to ASHRAE A2 support are as follows:

- With 24x NVMe front drive bays + 8x mid-chassis drive bays, ambient temperature cannot exceed 30°C
- With 8x 3.5-inch front drives + 6x single-wide GPUs, ambient temperature cannot exceed 30°C
- With 8x 3.5-inch or 8x 2.5-inch front drives + 3x double-wide GPUs, ambient temperature cannot exceed 30°C

See the [GPU adapters](#) section for details.

To comply with ASHRAE A3 and A4 specifications, the server models must meet the following hardware configuration requirements:

- Processor TDP greater than 155W not supported; the only exception is a configuration with 24x 2.5-inch front drive bays, where the processor TDP cannot exceed 120W.
- No support for 12x 3.5-inch front drive bays (the 8x 3.5-inch bay configuration is supported)
- No support for NVMe drives
- No support for rear drive bays or mid drive bays
- No support for GPUs
- No support for M.2
- No support for PCIe flash storage adapters
- No support for OCP networking adapters of 10Gb or faster
- No support for Ethernet adapters of 10GbE or faster
- No support for DIMMs of 128GB or larger capacity

The following additional restrictions apply if the server has a 280W processor installed:

- With either of the following drive bay configurations, slots 1, 2, 3 and the OCP slot cannot be used, and ambient temperature cannot exceed 35°C:
 - 12x 3.5-inch SAS/SATA front drives (no mid drives, no rear drives)
 - 8x 3.5-inch SAS/SATA + 4x 3.5-inch AnyBay front drives (no mid drives, no rear drives)
- With either of the following drive bay configurations, slot 3 and the OCP slot cannot be used, and ambient temperature cannot exceed 30°C:
 - 12x 3.5-inch SAS/SATA front drives + 4x 3.5-inch rear drives (no mid drives)
 - 8x 3.5-inch SAS/SATA + 4x 3.5-inch AnyBay front drives + 4x 3.5-inch rear drives (no mid drives)
- With any of the following drive bay configurations, the following OCP adapters cannot be used and ambient temperature cannot exceed 35°C:
 - 24x 2.5-inch SAS/SATA (no mid drives, no rear drives)
 - 24x 2.5-inch NVMe (no mid drives, no rear drives)
 - 8x 2.5-inch NVMe + 16x 2.5-inch SAS/SATA (no mid drives, no rear drives)
 - ThinkSystem Broadcom 57454 10GBASE-T 4-port OCP Ethernet Adapter, 4XC7A08240
 - ThinkSystem Broadcom 57416 10GBASE-T 2-port + 5720 1GbE 2-port OCP Ethernet Adapter, 4XC7A08239
 - ThinkSystem Broadcom 57416 10GBASE-T 2-port OCP Ethernet Adapter, 4XC7A08236
 - ThinkSystem Broadcom 57454 10/25GbE SFP28 4-port OCP Ethernet Adapter, 4XC7A08242

- The following drive bay configurations are not supported:
 - 12x 3.5-inch SAS/SATA front drives + any mid drives
 - 8x 3.5-inch SAS/SATA + 4x 3.5-inch AnyBay front drives + any mid drives

The following additional restriction apply if the server has either the EPYC 7313 or 7313P processor installed:

- The ambient temperature cannot exceed 30°C if the following drive bays are configured:
 - 12x 3.5-inch SAS/SATA front drives + 4x 3.5-inch SAS/SATA mid drives
 - 8x 3.5-inch AnyBay front drives + 4x 3.5-inch AnyBay mid drives

Temperature and humidity

The server is supported in the following environment:

- Air temperature:
 - Operating:
 - ASHRAE Class A2: 10°C to 35°C (50°F to 95°F); the maximum ambient temperature decreases by 1°C for every 300 m (984 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class A3: 5°C to 40°C (41°F to 104°F); the maximum ambient temperature decreases by 1°C for every 175 m (574 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class A4: 5°C to 45°C (41°F to 113°F); the maximum ambient temperature decreases by 1°C for every 125 m (410 ft) increase in altitude above 900 m (2,953 ft).
 - Server off: 5°C to 45°C (41°F to 113°F)
 - Shipment/storage: -40°C to 60°C (-40°F to 140°F)
- Maximum altitude: 3,050 m (10,000 ft)
- Relative Humidity (non-condensing):
 - Operating
 - ASHRAE Class A2: 8% to 80%; maximum dew point: 21°C (70°F)
 - ASHRAE Class A3: 8% to 85%; maximum dew point: 24°C (75°F)
 - ASHRAE Class A4: 8% to 90%; maximum dew point: 24°C (75°F)
 - Shipment/storage: 8% to 90%

Heat output

The server generates the following heat/thermal output:

- Minimum configuration: 421 BTU/hr, 123 W
- Maximum configuration: 5606 BTU/hr, 1643 W

Acoustical noise emissions

The server has the following acoustic noise emissions declaration:

- Sound power level (L_{WA}):
 - Idling: 6.2 Bel (typical), 7.0 Bel (Storage rich), 7.0 Bel (GPU rich)
 - Operating: 6.2 Bel (typical), 7.2 Bel (storage rich), 8.5 Bel (GPU rich)
- Sound pressure level (L_{pA}):
 - Idling: 46 dBA (Typical), 54 dBA (Storage rich), 54 dBA (GPU rich)
 - Operating: 47 dBA (Typical), 56 dBA (Storage rich), 69 dBA (GPU rich)

Notes:

- The sound levels were measured in controlled acoustical environments according to procedures specified by ISO7779 and are reported in accordance with ISO 9296.
- The declared acoustic sound levels are based on the following configurations, which may change depending on configuration/conditions:
 - Typical: 1x 155W CPU, 16x 32GB RDIMM, 16x 2.5" HDD, RAID 930-16i, 10GBASE-T 2-port PCIe Ethernet Adapter, 2x 750W PSU

- Storage rich: 1x 155W CPU, 16x 64GB RDIMM, 20x3.5" HDD, RAID 930-24i, 10GBASE-T 4-port PCIe Ethernet Adapter, 2x 750W PSU
- GPU rich: 1x 155W CPU, 16x 64GB RDIMM, 8x 2.5" HDD, RAID 930-8i, 10GBASE-T 4-port PCIe Ethernet Adapter, 3x V100 GPU, 2x 1600W PSU

Shock and vibration

The server has the following vibration and shock limits:

- Vibration:
 - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
 - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:
 - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
 - Non-operating:
 - 23 kg - 31 kg: 35 G for 152 in./sec velocity change across 6 surfaces (3x GPU config, 2.5" config)
 - 32 kg - 68 kg: 35 G for 136 in./sec velocity change across 6 surfaces (20x 3.5" HDD config)

Weight information for SR655 measuring in shock & vibration test:

- 3.5"x 12 HS + 3x DW GPU: 31.74 (kg)
- 3.5"x 12 HS + Mid 3.5"x4 HS + Rear 3.5"x4 HS: 35.74 (kg)
- 2.5"x 24 HS + Mid 2.5"x8 HS + Rear 2.5"x4 HS: 29.49 (kg)

Particulate contamination

Airborne particulates (including metal flakes or particles) and reactive gases acting alone or in combination with other environmental factors such as humidity or temperature might damage the system that might cause the system to malfunction or stop working altogether.

The following specifications indicate the limits of particulates that the system can tolerate:

- Reactive gases:
 - The copper reactivity level shall be less than 200 Angstroms per month (Å/month)
 - The silver reactivity level shall be less than 200 Å/month
- Airborne particulates:
 - The room air should be continuously filtered with MERV 8 filters.
 - Air entering a data center should be filtered with MERV 11 or preferably MERV 13 filters.
 - The deliquescent relative humidity of the particulate contamination should be more than 60% RH
 - Environment must be free of zinc whiskers

For additional information, see the Specifications section of the documentation for the server, available from the Lenovo Documents site, <https://pubs.lenovo.com/>

Warranty upgrades and post-warranty support

The SR655 has a 1-year or 3-year warranty based on the machine type of the system:

- 7Y00 - 1 year warranty
- 7Z01 - 3 year warranty

Our global network of regional support centers offers consistent, local-language support enabling you to vary response times and level of service* to match the criticality of your support needs:

- **Standard Next Business Day** – Best choice for non-essential systems requiring simple maintenance.
- **Premier Next Business Day** – Best choice for essential systems requiring technical expertise from senior-level Lenovo engineers.
- **Premier 24x7 4-Hour Response** – Best choice for systems where maximum uptime is critical.
- **Premier Enhanced Storage Support 24x7 4-Hour Response** – Best choice for storage systems where maximum uptime is critical.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers Services](#).

* Some service levels may not be available in all markets. Contact your sales representative for more information.

Services

Lenovo Data Center Services empower you at every stage of your IT lifecycle. From expert advisory and strategic planning to seamless deployment and ongoing support, we ensure your infrastructure is built for success. Our comprehensive services accelerate time to value, minimize downtime, and free your IT staff to focus on driving innovation and business growth.

Note: Some service options may not be available in all markets or regions. For more information, go to <https://lenovocator.com/>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

In this section:

- [Lenovo Advisory Services](#)
- [Lenovo Plan & Design Services](#)
- [Lenovo Deployment, Migration, and Configuration Services](#)
- [Lenovo Support Services](#)
- [Lenovo Managed Services](#)
- [Lenovo Sustainability Services](#)

Lenovo Advisory Services

Lenovo Advisory Services simplify the planning process, enabling customers to build future-proofed strategies in as little as six weeks. Consultants provide guidance on projects including VM migration, storage, backup and recovery, and cost management to accelerate time to value, improve cost efficiency, and build a flexibly scalable foundation.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

Lenovo Plan & Design Services

Unlock faster time to market with our tailored, strategic design workshops to align solution approaches with your business goals and technical requirements. Leverage our deep solution expertise and end-to-end delivery partnership to meet your goals efficiently and effectively.

Lenovo Deployment, Migration, and Configuration Services

Optimize your IT operations by shifting labor-intensive functions to Lenovo's skilled technicians for seamless on-site or remote deployment, configuration, and migration. Enjoy peace of mind, faster time to value, and

comprehensive knowledge sharing with your IT staff, backed by our best-practice methodology.

- **Deployment Services for Storage and ThinkAgile**

A comprehensive range of remote and onsite options tailored specifically for your business needs to ensure your storage and ThinkAgile hardware are fully operational from the start.

- **Hardware Installation Services**

A full-range, comprehensive setup for your hardware, including unpacking, inspecting, and positioning components to ensure your equipment is operational and error-free for the most seamless and efficient installation experience, so you can quickly benefit from your investments.

- **DM/DG File Migration Services**

Take the burden of file migration from your IT's shoulders. Our experts will align your requirements and business objectives to the migration plans while coordinating with your team to plan and safely execute the data migration to your storage platforms.

- **DM/DG/DE Health Check Services**

Our experts perform proactive checks of your Firmware and system health to ensure your machines are operating at peak and optimal efficiency to maximize up-time, avoid system failures, ensure the security of IT solutions and simplify maintenance.

- **Factory Integrated Services**

A suite of value-added offerings provided during the manufacturing phase of a server or storage system that reduces time to value. These services aim at improving your hardware deployment experience and enhance the quality of a standard configuration before it arrives at your facility.

Lenovo Support Services

In addition to response time options for hardware parts, repairs, and labor, Lenovo offers a wide array of additional support services to ensure your business is positioned for success and longevity. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

- **Premier Support for Data Centers**

Your direct line to the solution that promises the best, most comprehensive level of support to help you fully unlock the potential of your data center.

- **Premier Support Plus (PSP) for Servers 24x7 4-Hour Response**

Helping customers reduce unplanned downtime by moving from reactive support to proactive and preventative care

- **Premier Enhanced Storage Support (PESS)**

Gain all the benefits of Premier Support for Data Centers, adding dedicated storage specialists and resources to elevate your storage support experience to the next level.

- **Committed Service Repair (CSR)**

Our commitment to ensuring the fastest, most seamless resolution times for mission-critical systems that require immediate attention to ensure minimal downtime and risk for your business. This service is only available for machines under the Premier 4-Hour Response SLA.

- **Multivendor Support Services (MVS)**

Your single point of accountability for resolution support across vast range of leading Server, Storage, and Networking OEMs, allowing you to manage all your supported infrastructure devices seamlessly from a single source.

- **Keep Your Drive (KYD)**

Protect sensitive data and maintain compliance with corporate retention and disposal policies to ensure your data is always under your control, regardless of the number of drives that are installed in your Lenovo server.

- **Technical Account Manager (TAM)**

Your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time, ensuring smooth operations and optimized performance as your business grows.

- **Enterprise Software Support (ESS)**

Gain comprehensive, single-source, and global support for a wide range of server operating systems and Microsoft server applications.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers](#).

Lenovo Managed Services

Achieve peak efficiency, high security, and minimal disruption with Lenovo's always-on Managed Services. Our real-time monitoring, 24x7 incident response, and problem resolution ensure your infrastructure operates seamlessly. With quarterly health checks for ongoing optimization and innovation, Lenovo's remote active monitoring boosts end-user experience and productivity by keeping your data center's hardware performing at its best.

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure you systems are providing business value through optimized performance.

Lenovo Sustainability Services

- **Asset Recovery Services**

Lenovo Asset Recovery Services (ARS) provides a secure, seamless solution for managing end-of-life IT assets, ensuring data is safely sanitized while contributing to a more circular IT lifecycle. By maximizing the reuse or responsible recycling of devices, ARS helps businesses meet sustainability goals while recovering potential value from their retired equipment. For more information, see the [Asset Recovery Services offering page](#).

- **CO2 Offset Services**

Lenovo's CO2 Offset Services offer a simple and transparent way for businesses to take tangible action on their IT footprint. By integrating CO2 offsets directly into device purchases, customers can easily support verified climate projects and track their contributions, making meaningful progress toward their sustainability goals without added complexity.

- **Lenovo Certified Refurbished**

Lenovo Certified Refurbished offers a cost-effective way to support IT circularity without compromising on quality and performance. Each device undergoes rigorous testing and certification, ensuring reliable performance and extending its lifecycle. With Lenovo's trusted certification, you gain peace of mind while making a more sustainable IT choice.

Lenovo TruScale

Lenovo TruScale XaaS is your set of flexible IT services that makes everything easier. Streamline IT procurement, simplify infrastructure and device management, and pay only for what you use – so your business is free to grow and go anywhere.

Lenovo TruScale is the unified solution that gives you simplified access to:

- The industry's broadest portfolio – from pocket to cloud – all delivered as a service
- A single-contract framework for full visibility and accountability
- The global scale to rapidly and securely build teams from anywhere
- Flexible fixed and metered pay-as-you-go models with minimal upfront cost
- The growth-driving combination of hardware, software, infrastructure, and solutions – all from one single provider with one point of accountability.

For information about Lenovo TruScale offerings that are available in your region, contact your local Lenovo sales representative or business partner.

Regulatory compliance

The SR655 server conforms to the following standards:

- Energy Star 3.0
- FCC: Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES-003, issue 6, Class A
- UL/IEC 60950-1
- CSA C22.2 No. 60950-1
- NOM-019
- Argentina IEC60950-1
- Japan VCCI, Class A
- Australia/New Zealand AS/NZS CISPR 32, Class A; AS/NZS 60950.1
- IEC 60950-1 (CB Certificate and CB Test Report)
- China CCC (GB4943.1), GB9254 Class A, GB17625.1
- Taiwan BSMI CNS13438, Class A; CNS14336-1
- Korea KN32, Class A; KN35
- Russia, Belorussia and Kazakhstan, EAC: TP TC 004/2011(for Safety); TP TC 020/2011(for EMC)
- CE Mark (EN55032 Class A, EN60950-1, EN55024, EN61000-3-2, and EN61000-3-3)
- CISPR 32, Class A
- TUV-GS (EN60950-1 /IEC60950-1, EK1-ITB2000)
- India BIS certification

External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the [SAS adapters for external storage](#) section.

Note: Information provided in this section is for ordering reference purposes only. For the operating system and adapter support details, refer to the interoperability matrix for a particular storage enclosure that can be found on the Lenovo Data Center Support web site:

<http://datacentersupport.lenovo.com>

Table 80. External drive enclosures

Model	Description
4587HC1	Lenovo Storage D1212 Disk Expansion Enclosure (2U enclosure with 12x LFF drive bays)
4587HC2	Lenovo Storage D1224 Disk Expansion Enclosure (2U enclosure with 24x SFF drive bays)
6413HC1	Lenovo Storage D3284 High Density Expansion Enclosure (5U enclosure with 84x LFF drive bays)
7DAHCTO1WW	Lenovo ThinkSystem D4390 Direct Attached Storage (4U enclosure with 90x LFF drive bays)

For details about supported drives, adapters, and cables, see the following Lenovo Press Product Guides:

- Lenovo Storage D1212 and D1224
<http://lenovopress.lenovo.com/lp0512>
- Lenovo Storage D3284
<http://lenovopress.lenovo.com/lp0513>
- Lenovo ThinkSystem D4390
<https://lenovopress.lenovo.com/lp1681>

External storage systems

Lenovo offers the ThinkSystem DE Series, ThinkSystem DG Series, ThinkSystem DM Series and ThinkSystem DS Series external storage systems for high-performance storage. See the DE Series, DG Series and DM Series product guides for specific controller models, expansion enclosures and configuration options:

- ThinkSystem DE Series Storage
<https://lenovopress.com/storage/thinksystem/de-series#rt=product-guide>
- ThinkSystem DS Series Storage
<https://lenovopress.lenovo.com/storage/thinksystem/ds-series>
- ThinkSystem DM Series Storage
<https://lenovopress.com/storage/thinksystem/dm-series#rt=product-guide>
- ThinkSystem DG Series Storage
<https://lenovopress.com/storage/thinksystem/dg-series#rt=product-guide>

External backup units

The server supports both USB-attached RDX backup units and SAS-attached tape drives.

The following table lists the available external SAS tape backup options.

Tip: Verify the end-to-end support of an IBM tape backup solution through the IBM System Storage Interoperation Center (SSIC): <http://www.ibm.com/systems/support/storage/ssic>

Table 81. External SAS backup options

Part number	Description
External SAS tape backup drives	
6160S6E	IBM TS2260 Tape Drive Model H6S
6160S7E	IBM TS2270 Tape Drive Model H7S
6160S8E	IBM TS2280 Tape Drive Model H8S
6160S9E	IBM TS2290 Tape Drive Model H9S
External SAS tape backup autoloaders	
6171S6R	IBM TS2900 Tape Autoloader w/LTO6 HH SAS
6171S7R	IBM TS2900 Tape Autoloader w/LTO7 HH SAS
6171S8R	IBM TS2900 Tape Autoloader w/LTO8 HH SAS
6171S9R	IBM TS2900 Tape Autoloader w/LTO9 HH SAS
External tape backup libraries	
6741A1F	IBM TS4300 3U Tape Library Base Unit
6741B1F	IBM TS4300 3U Tape Library Base Unit - Max 48U
6741A3F	TS4300 Tape Library Expansion Unit
6741B3F	IBM TS4300 3U Tape Library Expansion Unit - Max 48U
SAS backup drives for TS4300 Tape Library	
01KP934	LTO 6 HH SAS Drive
01KP937	LTO 7 HH SAS Drive
01KP953	LTO 8 HH SAS Drive
02JH836	LTO 9 HH SAS Drive

For more information, see the list of Product Guides in the Backup units category:

<https://lenovopress.com/servers/options/backup>

The following table lists the external RDX backup options available.

Table 82. External RDX dock and cartridges

Part number	Feature code	Description
External RDX docks		
4T27A10725	B32R	ThinkSystem RDX External USB 3.0 Dock (No cartridge included with the drive)
Cartridges		
7TP7A01601	AVF8	ThinkSystem RDX 500GB Cartridge
7TP7A01602	AVF1	ThinkSystem RDX 1TB Cartridge
7TP7A01603	AVF0	ThinkSystem RDX 2TB Cartridge
7TP7A04318	AXD1	ThinkSystem RDX 4TB Cartridge

For more information, see the Lenovo RDX USB 3.0 Disk Backup Solution product guide:
<https://lenovopress.com/tips0894-rdx-usb-30>

Top-of-rack Ethernet switches

The following table lists the Ethernet LAN switches that are offered by Lenovo.

Table 83. Ethernet LAN switches

Part number	Description
1 Gb Ethernet Rack switches	
7Y810011WW	Lenovo ThinkSystem NE0152T RackSwitch (Rear to Front)
7Z320011WW	Lenovo ThinkSystem NE0152TO RackSwitch (Rear to Front, ONIE)

Lenovo Financial Services

Why wait to obtain the technology you need now? No payments for 90 days and predictable, low monthly payments make it easy to budget for your Lenovo solution.

- **Flexible**

Our in-depth knowledge of the products, services and various market segments allows us to offer greater flexibility in structures, documentation and end of lease options.

- **100% Solution Financing**

Financing your entire solution including hardware, software, and services, ensures more predictability in your project planning with fixed, manageable payments and low monthly payments.

- **Device as a Service (DaaS)**

Leverage latest technology to advance your business. Customized solutions aligned to your needs. Flexibility to add equipment to support growth. Protect your technology with Lenovo's Premier Support service.

- **24/7 Asset management**

Manage your financed solutions with electronic access to your lease documents, payment histories, invoices and asset information.

- **Fair Market Value (FMV) and \$1 Purchase Option Leases**

Maximize your purchasing power with our lowest cost option. An FMV lease offers lower monthly payments than loans or lease-to-own financing. Think of an FMV lease as a rental. You have the flexibility at the end of the lease term to return the equipment, continue leasing it, or purchase it for the fair market value. In a \$1 Out Purchase Option lease, you own the equipment. It is a good option when you are confident you will use the equipment for an extended period beyond the finance term. Both lease types have merits depending on your needs. We can help you determine which option will best meet your technological and budgetary goals.

Ask your Lenovo Financial Services representative about this promotion and how to submit a credit application. For the majority of credit applicants, we have enough information to deliver an instant decision and send a notification within minutes.

Seller training courses

The following sales training courses are offered for employees and partners (login required). Courses are listed in date order.

1. **Partner Technical Webinar: Intel Xeon 6 & Ethernet NIC update**

2026-07-14 | 60 minutes | Employees and Partners

In this 60 minute replay, Madhu Bramharouthu and Raj Pathak from Intel presented the latest information on Xeon 6 processors and Intel Ethernet adapters.

Published: 2026-07-14

Length: 60 minutes

Start the training:

Employee link: [Grow@Lenovo](#)

Partner link: [Lenovo 360 Learning Center](#)

Course code: JUL1026

2. **Lenovo Data Center Sales Certification Exam Study Guide**

2026-07-13 | 10 minutes | Employees and Partners

This guide includes information to help candidates prepare and register for the Data Center Sales practice and certification exams.

Published: 2026-07-13

Length: 10 minutes

Start the training:

Employee link: [Grow@Lenovo](#)

Partner link: [Lenovo 360 Learning Center](#)

Course code: LENU-122C-SG

3. **Lenovo Data Center Technical Certification Exam Study Guide**

2026-07-13 | 10 minutes | Employees and Partners

This guide includes information to help candidates prepare and register for the Data Center Technical practice and certification exams.

Published: 2026-07-13

Length: 10 minutes

12. **ThinkSystem Rack & Tower Server Primer - Module 2**

2025-12-17 | 45 minutes | Employees Only

This course builds on the foundational concepts from the prework modules, helping Client Managers deepen their understanding of ThinkSystem Rack and Tower Servers and apply that knowledge to confidently initiate value-driven customer conversations. Please Note: The videos in this course are taken from the Module 2 live session led by Tikiri Wandregala.

By the end of this course, you will be able to:

- Demonstrate the ability to initiate a data center discussion with a customer.
- Analyze and evaluate potential data center opportunities.
- Apply criteria to effectively qualify an opportunity.
- Locate and differentiate key resources and contacts.

17. **Family Portfolio: Server Component Options**

2025-07-21 | 20 minutes | Employees and Partners

This course covers opportunities that are available to upsell server components. By upselling the correct components, you can increase the size and revenue of the original sale.

After completing this course, you should be able to:

- Identify the opportunities for an upsell
- Recognize when specific products should be discussed
- Emphasize how a product benefits the customer
- Identify keywords that indicate upsell opportunities

19. **Lenovo Data Center Product Portfolio**

2025-06-11 | 20 minutes | Employees and Partners

This course introduces the Lenovo data center portfolio, and covers servers, storage, storage networking, and software-defined infrastructure products. After completing this course about Lenovo data center products, you will be able to identify product types within each data center family, describe Lenovo innovations that this product family or category uses, and recognize when a specific product should be selected.

Course objectives:

1. Identify product types within each data center family
2. Describe the features of the product family or category
3. Recognize when a specific product should be selected

21. **VTT AI: Introducing the Lenovo Hybrid AI 285 Platform April 2025**

2025-04-30 | 60 minutes | Employees Only

The Lenovo Hybrid AI 285 Platform enables enterprises of all sizes to quickly deploy AI infrastructures supporting use cases as either new greenfield environments or as an extension to current infrastructures. The 285 Platform enables the use of the NVIDIA AI Enterprise software stack. The AI Hybrid 285 platform is the perfect foundation supporting Lenovo Validated Designs.

- Technical overview of the Hybrid AI 285 platform
- AI Hybrid platforms as infrastructure frameworks for LVDs addressing data center-based AI solutions.
- Accelerate AI adoption and reduce deployment risks
